Acknowledgements

This thesis work has been a great journey for me - full of endurance, perseverance and hard work, which helped me raise my intellect, self-belief and confidence. Although this intriguing journey was full of troughs and crests, I was able to complete it because of able mentors, friends and family who stood by me and helped me at different steps. Without their support and co-operation, it would not have been possible for me to complete this herculean task.

First, I would like to express my sincere gratitude to my esteemed teacher and guide, Dr. Abha R. Aggarwal for her continuous support, guidance, patience, ingenious advice and constructive criticism. She has supported me as a mentor, preached me as a well-wisher and taught me as a guide. A special note of thanks to her for providing me constant encouragement, the help extended to me when I approached her and the valuable discussion with her during the course of research.

I extend my profound gratitude to Prof. (Dr.) T.P. Yadav (Dean, University School of Medicine and Para Medical Health Sciences, GGSIP University) for his constant motivation and support. Needless to mention that his easy approachability and valuable suggestions always helped me to improve the quality of my work. I would also like to extend my sincere thanks to the School Research Committee (University School of Medicine and Para Medical Health Sciences, GGSIP University), which always helped me with insightful comments and constructive encouragement.

I will forever be indebted to Prof. S.K. Bhargava (Founder, New Delhi Birth Cohort). He has always been a great support and source of inspiration for me. I am highly thankful to him for giving me an opportunity to work as a member of the New Delhi Birth Cohort team and making my thesis journey so wonderful and memorable.

I am highly obliged to Prof. H.P.S Sachdev for his continuous support, patience and motivation. Working under his guidance was a lifetime experience to have a strong and stable foundation for a bright future.
I greatly appreciate the valuable guidance, scholarly inputs and consistent encouragement received from Prof. Clive Osmond (Professor of Biostatistics, University of Southampton) and Prof. Caroline Fall (Professor of International Paediatric Epidemiology, University of Southampton). Their unconditional support, motivation and immense knowledge have always helped me to improve my knowledge and work.

My sincere thanks to all the members of the New Delhi Birth Cohort team who were always there to provide invaluable help. I express my gratitude to the Indian Council of Medical Research for providing me financial assistance under Senior Research Fellowship scheme, and the National Institute of Medical Statistics and Sitaram Bhartia Institute of Science and Research, New Delhi for providing me the requisite infrastructure and support for my thesis work.

I am thankful to the cohort subjects and their children who co-operated to be a part of my thesis work. Without their support, this work could never have been completed.

I am grateful to my all friends and colleagues for their undying faith in me. Special thanks to my pillars of strength, especially to get past difficult times — Avika, Parul, Nitendra Mathur, Arpna, Deepti, Susmita, Sonia, Shailendra, Vijay, Manpreet, Sreeja, Komal, Harvinder, Kavita, Deepa and Muntafa. I thank my family for their unconditional support and encouragement to pursue my interests, listening to my complaints and frustrations, and believing in me. Words are insufficient to express my gratitude and appreciation towards my parents, Mr. Mahesh Prasad and Mrs. Ruby Lata. It is their love, sacrifices and prayers that shaped my dreams and aspiration into reality. My sister Prachi was the bundle of joy, who always helped me to think positive and keep going.

Last but not the least, I thank the Almighty GOD for his endless blessings bestowed on me and for providing a direction to make it possible for me to reach here.

Sikha Sinha
