## 1. INTRODUCTION AND SCOPE OF THE THESIS

1.1 Energy and sustainable development
1.2 Sustainable energy alternatives
1.3 Why Titanium dioxide nanotubes (TONTs)?
  1.3.1 First generation of TONTs
  1.3.2 Second generation of TONTs
  1.3.3 Third generation of TONTs
1.4 Scope of the Ph.D thesis

## 2. TiO₂: PROPERTIES AND APPLICATIONS

2.1 Research potential of TiO₂
2.2 Properties of TiO₂
2.3 Various methods of fabricating TiO₂ nanotubes
  2.3.1 TiO₂ nanotubes by electrochemical anodization: Formation and growth mechanism
2.4 Applications of TiO₂ nanotubes
2.5 Experimental and analytical techniques
  2.5.1 Analytical techniques
2.6 Summary
3. FABRICATION AND OPTIMIZATION OF TiO₂ NANOTUBES

3.1 Fabrication of TiO₂ nanotubes
   3.1.1 Anodization in HF based electrolyte
   3.1.2 TiO₂ Nanotubes formed in organic electrolytes
   3.1.3 Nanograss formation and removal methods

3.2 Material properties of TiO₂ nanotubes

3.3 Effect of post deposition annealing on the crystallinity of TiO₂ nanotubes

3.4 Summary

4. ROOM TEMPERATURE CRYSTALLIZATION OF TiO₂ NANOTUBES

4.1 Introduction

4.2 Pulsed crystallization of TiO₂ nanotubes

4.3 Results and analysis

4.4 Mechanism of pulsed crystallization of TiO₂ nanotubes

4.5 Summary

5. METAL DOPING OF TiO₂ NANOTUBES

5.1 Introduction

5.2 Experimental details

5.3 Results and Discussion

5.4 Summary

6. PREFERENTIAL ORIENTATION OF THE ZINC INCORPORATED TiO₂ NANOTUBES

6.1 Preferential Oriented TiO₂ nanotubes
   6.1.1 Experimental details
