ACKNOWLEDGEMENTS

The work to this doctoral thesis has been carried out by me as a research scholar at the Department of Computer Science of Banasthali Vidyapith, Rajasthan. This duration has been very stimulating and instructive for me. The work presented in this thesis would not have been possible without my close association with many people who were always there when I needed them the most. I take this opportunity to acknowledge them and extend my sincere gratitude for helping me make this Ph.D. thesis a possibility.

At this moment of accomplishment, first of all I pay homage to my guide, Dr. Pratistha Mathur for her untiring support, encouragement and able guidance at each and every step throughout this research endeavour. This work would not have been possible without her support. I admire the knowledge of my supervisor. It is really fortunate that I got such an opportunity to learn the ABC of research from her, under her guidance I successfully overcame many difficulties and learned a lot, which will definitely go a long way in my professional career. This feat was possible only because of the unconditional support provided by her, I find no words to express my heartfelt thanks to Dr. Pratistha Mathur for supervising this work so diligently and delightfully. It has indeed been a privilege to carry out this research work under her guidance. A person with an amicable and positive disposition, Mam has always made her available to clarify my doubts despite her busy schedules and I consider it as a great opportunity to do my doctoral programme under her guidance and to learn from her research expertise. Thank you Mam, for all your help and support.

I am grateful to the Director, Banasthali Vidyapith, Rajasthan for providing me university’s resources and facilities necessary to carry out this research work.

I am thankful to my university colleagues for supporting me during the study time frame. Also I am thankful to the University for providing the necessary support whenever needed.
My hearty thanks to all the anonymous referees of several international research journals, in the domain of image processing, quality, pattern recognition for their constructive comments and new ideas for improvement of the research work.

I wish to thank many acclaimed researchers and reviewers of our publications across the world for valuable ideas and suggestions. Thanks to all researchers and paper authors, from where we got reference for our research and analysis of their proposed methodologies.

Finally I would like to thanks my parents who gave me the courage to get my education, supported me in all achievements throughout my life. I am grateful to my in-laws and my parents for their continuous encouragement and motivation. I must acknowledge the constant cooperation, hard work and moral support of my loving husband Sandeep Kumar Janu along with our lovely children Shreyansh and Aadish throughout this research work, without which it could have not been possible to achieve this target so contentedly. Above all I pay my reverence to the almighty God.
