Acknowledgements

Carrying out research and writing a PhD thesis is such that it cannot be done alone. There are several people who have significantly contributed to this endeavor. I am grateful to all the persons who have been so helpful to me during my stay at Indian Association for the Cultivation of Science (IACS), Kolkata, during 2009-2013. I would like to express my gratitude to all of them.

First of all, I would like to express my sincere gratitude to my supervisor Prof. Amlan J. Pal for introducing me to such a growing field of research and for giving me countless opportunities, enthusiasm, immense knowledge, and pointing out numerous pitfalls in my thinking. His guidance helped me in the research work and writing of my thesis.

I am thankful to authorities of Indian Association for the Cultivation of Science for providing all the facilities needed to carry out this dissertation. I would like to acknowledge Council of Scientific & Industrial Research (CSIR) for providing CSIR-NET fellowship.

Without certain persons my work would have been much more difficult. In particular, I would like to mention about my lab-mates Saikat, Sudip, Sudipto, Abhijit and Uttiya whose help and cooperation made it possible to have a successful end of the journey. My special thanks go to my senior lab-mates Dr. Satyajit Sahu, Dr. Kalool Mohanta, Dr. Arup K. Rath, Dr. Bikash C. Das, Dr. Biju Ghosh and Dr. Asim Guchhait for sharing their understanding and giving correctional inputs regarding my work till the end. I would like to acknowledge the initial inspiration that I obtained from Prof. Ashis Bhattacharyya and Prof. Tapas K. Kundu of Visva-Bharati University.

My close association with Dipak Da, Rajib Da, Avijit (Sen) Sk, Sabhyasachi, Sanjit, Astam, Ali Hussain Khan, Sk, Basiruddin, Gautam, Moumita, everybody of Solid State Physics Department of IACS is worth remembering, both from academic and mostly non-academic point of view. Very special thanks to all of them for constant inspiration. I wish to thank all my friends and well wishers outside IACS, to name a few of them, Polash Khan, Hari Da, Sahnewaz, Subhajyoti, Raju, Jasim, Madhushree, Pranja, Kartik, Koushik, Jahangir, Anup (Chattu), Jayanta, Toton and Chanchal and Kalyan.

Last but not the least; I am indebted to my family, specially my nine months old son Arik, for being so considerate to me. I don’t know how I could have managed everything if I don’t have my wife Sumitra.

With this I stop here and hope you enjoy reading this thesis and find it scientifically simulating.

IACS, Kolkata
August, 2013

(Sukumar Dey)
