Acknowledgements

First and foremost, I feel it as an immense opportunity in conveying my deepest and most honest appreciation to my supervisor, Prof. L. Joyprakash Singh, PhD, for his outstanding guidance. His vivid knowledge in the area of this study helps me a lot since the inception of this work. His benevolence, commitment, friendly accessibility and attention to details have been a huge motivation to me. My genuine gratitude to my supervisor, for the boundless support and patience shown to me. I would particularly like to thank for all his help in un-wearyingly and vigilantly correcting all my manuscripts. It will be a big mistake on my part if I fail to humbly appreciate him for all his constructive suggestions.

I, with profound sense of responsibility, would like to express my deep appreciation and thanks to my Dr. Rupaban Subadar, Head of the Department, Electronics and Communication Engineering (EC), North-Eastern Hill University (NEHU), Shillong, for his guidance. He is always accessible to help me out of any problem faced during the course of this work. My humble thank is due to him, for his unlimited support and motivation. I also would like to thank him for patiently going through all my manuscript and for making corrections.

I would like to thank Prof G. Saha, Dean, School of Technology, NEHU, Shillong for all the co-operation rendered to me during the course of this work. My sincere thanks go to all the faculty colleagues and staff of my department, for their continuous encouragement and help. Specially, my faculty colleagues have been very supportive. I am also very
thankful to my doctoral committee members Dr. S. C. Arya, Dr. R. Subadar and Dr. P. Sarkar for sparing their precious time to evaluate the progress of my work. Their propositions have been valuable.

I owe profound gratitude to Prof. Peri Bhaskararao, IIIT Hyderabad, who guided me in learning linguistic aspect of the speech signals and tools necessary. His guidance has really helped me a lot in understanding the International Phonetic Alphabet (IPA) chart and various labeling tools for preparation of the speech database. My sincere regards and gratitude also goes to Prof. B. Yegnanarayana, IIIT Hyderabad and Prof. S. R. Mahadeva Prasanna, IIT Guwahati, Dr. Samudravijaya, IIT Guwahati for helping me in understanding the very basic concepts and important algorithms of the speech processing.

My friends and colleagues in the Department of EC and IT, NEHU made my life full of happiness and joy with constant source of encouragement all through my work. Among my friends, I would like to extend my special thanks to Mr. Subhash Sahana, Mr. Jaydeep Swarnakar, and Dr. Arnab Kumar Majhi. They have been assisting me with very valuable suggestions from time to time. Besides, I would like to acknowledge the assistance received from my students Mr. Salam Nandakishor and Mr. Gaurav Krishnan Deka along with the fellow research scholar Ms. Tanveera Ismail.

My deepest gratitude goes to my beloved wife Mrs. Archana Nath, (PhD, Biotechnology) for taking the pain of doing a lot of corrections with my writings all through my research. My love also goes to my daughter, Ms. Simran, who never tries to snatch away my attention from my work. My best regards also goes to my extended family, the in-laws for their constant love and support throughout my studies. The opportunities that they have created for me and their infinite sacrifices are never be forgotten.

Finally, I offer my sincere thanks to one and all whoever is directly or indirectly related to this work.

Sushanta Kabir Dutta
