I owe my deep sense of gratitude first of all to God who created me and made me what I am today. His blessings, mercy, guidance and strength made it possible for me to complete my research and enabled me to accomplish this project.

I would like to express my grateful thanks to my supervisor Prof. Syed Ibrahim Rizvi, Head, Department of Biochemistry, University of Allahabad, for providing me such a wonderful opportunity which will definitely evidence to be a good inaugural towards a bright career. I am deeply indebted to Prof. Rizvi Sir for his support and help during this work and for the excellent working conditions he provided me with. Without his guidance and persistent help this thesis would not have been possible. I gratefully acknowledge his advice, supervision, and crucial contribution, which made him a backbone of this research and so to this thesis.

It is my proud privilege to express my sincere thanks to Prof. G. K. Rai, Director, Centre of Food Technology, University of Allahabad, for giving me the opportunity to carry out my research work at the Institute. I owe my sincere gratitude to Prof. Neelam Yadav, Head, Centre of Food Technology, University of Allahabad, for providing appreciable direction and precious advice and her interest which is responsible for the accomplishment of this target. I am also thankful to Dr. Devindar Kaur, Dr. Neetu Mishra, Dr. Pinki Saini and Dr. Vineeta Puranik, Centre of Food Technology, University of Allahabad, for their valuable suggestions and encouragement throughout my research work.

I acknowledge the Department of Biochemistry, University of Allahabad and Prof. Rizvi Sir for allowing me to carry out most of my research work in Department of Biochemistry. I am extremely thankful to Prof. B. Sharma for his constant inspiration, scientific interest, great insight and guidance throughout my research. I am also thankful to Prof. Mrs. P. C. Mittal, Prof. D. K. Gupta and Dr. A. K. Pandey, Department of Biochemistry, University of Allahabad for their support, advice and suggestions.
I owe my sincere gratitude to Prof. Shanti Sundaram, Prof. Jagdamba Singh, Prof. A. K. Rai, Prof. D. K. Chauhan; the erudite members of Doctoral Programme Committee for extending their valuable suggestion, persistent encouragement and liberal help time to time.

I would like to express my deepest love and affection to my parents, father Mr. K. K. Jaiswal and mother Mrs. M. Jaiswal for all they did and will do for me all my life and to my dear sisters Mrs. Arti Jaiswal, Mrs. Abha Jaiswal and Richa Jaiswal for all their love and support they provide me and also to all other family members for their endless support, patience, affection and encouragement that have made it possible, which helped me to achieve where I am today. I am also much thankful to my friends Dr. Nalini Vishnoi and Dr. Preeti Srivastava for their moral support during my work.

I am sincerely grateful to Dr. Kanti Bhooshan Pandey, Department of Biochemistry, University of Allahabad, for his valuable suggestions and help associated with this project. I also thanks to Dr. S. Luqman, Dr. Neeti Srivastava and Dr. Pawan K. Maurya for their support and encouragement. I would like to give my special thanks to Mr. Sandeep Singh and Mr. Brahm K. Tiwari for her extreme help, friendship and support that they provided me throughout the course of study. I thank all my other lab members Dr. Shilpa Chakravarty, Mr. M. M. Mehdi, Mr. Prabhakar Singh and Ms. Mahejabeen Fatima, Department of Biochemistry, University of Allahabad for their cordial help and innovative ideas.

I am extremely thankful to all my friends and colleagues of Centre of Food Technology and Department of Biochemistry for help, support and friendship throughout my tenure. I offer my regards and gratitude to all those who supported me in any respect during the successful realization of this thesis, as well as express my apology to those whom I could not mention here by name.
