ACKNOWLEDGEMENTS

Looking back into the first day I stepped into NCCS, it's hard to believe that five and a half years have passed by, making me finally reach this stage of attaining my Ph.D. These have been the most important years of my life which has helped me grow scientifically, professionally as well as emotionally. Down the memory lane, I realize that this day would not have come by without the grace and blessings of Almighty; along with the help, support and constant encouragement of a lot of amazing personalities.

I have no words to thank my guide, Dr. Debashis Mitra, who has mentored me and has taught me the true essence of research; to think rationally, analyse critically and to work steadfastly. The freedom that he provided in designing and execution of experiments has made me capable of independent thinking and analysis, which I consider as one of the best assets I gained from being his student. My work would never have been moulded into this shape without the constant discussions and critical analyses by him. The journey through my Ph.D. was never an easy one. At times of distress, his immense emotional support and his own life experiences have helped me a lot to push my way through all that. I owe my deepest gratitude to you Sir.

Dr. Manas Kumar Santra, is yet another important person who has helped me shape my career. I am sincerely grateful to him for the scientific help and active discussions that have enlightened my thought process and scientific capabilities. To work in collaboration with him was a great experience. I am deeply obliged to Dr. Payel Ghosh, from the Bioinformatics Centre, University of Pune, who has extended her sincere and timely help in improving the quality of my work with her technical expertise. I would also like to thank Dr. Akhil C. Banerjea from National Institute of Immunology, Delhi for providing me with the wild-type Vif plasmid construct.

I owe my gratitude to Padmashree Dr. G.C. Mishra, former Director, NCCS, as well as to Dr. Shekhar C. Mande, Director, NCCS for providing an excellent opportunity to work in this esteemed institute and also for providing opportunities to avail the best facilities. I also extend my gratefulness to my registration and synopsis committee members - Dr. J. K. Pal, Dr. Aroind Sahu and Dr. Manoj Bhat who were also involved in my SRF evaluation and fourth year extension. Their time to time suggestions and scientific analyses were greatly helpful in my Ph.D. work.

My sincere gratitude to Dr. Milind Patole who is the in-charge of media section, cell repository and confocal facility as well as to Dr. Yogesh Shouche, the in-charge of DNA sequencing facility. I would also like to thank Dr. Sanjit, Dr. Saha, Dr. Joe, Dr. Sheshadri, Dr. Rapole, Dr. Limaye, Dr. Krishnaswathy, Dr. Girdhari Lal, Dr. Wani, Dr. Lenka, Dr. Bapat, Dr. Padma Shastri and Dr. Sitasaavad as well as other faculty members of NCCS, who have helped me use their laboratory facilities during my Ph.D. career. Special thanks to Dr. Sheshadri for being a very approachable hostel warden. I am also grateful to Dr. Mitra’s family - Sutapa Ma’m, Rai, Rini and Sir’s mom for their warmth and support.
would also like to thank Dr. Bhat and Nayan Ma’am for the blissful conversations and moral support. Thanks to Dr. Joe and his family as well.

I would also like to thank all the technicians at the NCCS core FACS facility including Hentangini, Amit Salunke, Aswathini Kore and Pratibha Patil as well as Trupti and Ashwini Atre at the confocal facility. I would also like to acknowledge technicians at the mass spectrometry facility Ms. Snigdha Dhali and Mr. D. Venkateshwarlu Naik. My sincere gratitude to all the people at the academic, administration, accounts, computer, library, dispatch, stores and purchase sections as well as, electric, maintenance, washing and decontamination sections for the smooth execution of the systems as well as timely assistance. I would like to specially thank Mr. Sindigi, instrument engineer at NCCS, for prompt rectification of any technical faults in instruments. He has been very approachable and friendly.

Special thanks to Sehban from Dr. Manas’s group, Abdul from Dr. Sheshadri’s group and Hemendra from Dr. Sahu’s group for their support and help in my work. I would also like to thank Late Mr. Yogesh Panse who had been Dr. Sahu’s technician.

I am deeply grateful to my lab seniors Zulu, Manoj, Pratima, Sohrab, Neera, Sudeep and Priyanka who have extended their sincere help and advice whenever needed. I would like to specially thank Priyanka, my immediate senior, for the immense professional and personal support she has given me throughout the tenure of my Ph.D. She has been a constant motivation to me both scientifically and emotionally. I would also like to personally thank seniors from other labs including Ranveer (Dr. Galande), Muzammil (Dr. Sahu), Murugaiyan (Dr. Saha) and Ajay (Dr. Bhat) for all their help.

It’s my pleasure to extend my gratitude to my lab members Sujata Ma’am, Surya, Jay, Kailash, Kruthika, Muneesh, Sukhadev, Anjali and Anindita for their support and maintenance of a joyous environment in the lab. Thanks to you all for being very cooperative, understanding and helpful. It would have been difficult to reach here without each of your support. I would also like to thank my previous labmates Sneha, Veronica, Sabbir and Ravi for all their help and support.

I extend my deepest gratitude to all my batchmates in NCCS for all the fun-filled conversations and amazing trips and treks we have had. The most memorable and cherished one is our trip to Tarkarli and Malvan! Thanks a lot Vikrant, Kanu, Poonpom, Silpa, Saru, Prachi, Chandu, Suchi, Mangesh, Mahendra, Darshana, Abdul, Prachi Jaiswal, Aditi, Deepak, Surbhi, Shriti and Sabbir. I would also like to thank Satish, Aditya, Sayoni, Sourav, Anil, Aryavindu, Srinath, Parul, Poornam, Rucha and Renuka. Thank you Surbhi, Priyanka and Silpa for being supportive and helpful hostel-mates as well. I also take this opportunity to deeply thank all my friends outside NCCS with special mention to Annu, Roshni, Geethu and Cherian who have been by my side since the past twelve years! You guys have played very important roles in my life. Annu has been a thorough support for me through thick and thin all these years. Special thanks to Priyanka, Gayatri and Sneha for all the joyous moments in NCCS! Thank you Sneha for all the yummy food you have cooked for us! And thank you Gayatri for our adventurous North trip and Priyanka for being the reason!
My family has been the pillar of my success throughout these years. I have no words to thank my husband who has not only been a tremendous moral support and shoulder to lean on, but an amazing friend since the time we are together. It’s a blessing to have you as my husband Achache! I am deeply obliged to my loving and highly supportive family. Nothing would have been possible without you Papa, Mummy, Chachi, Amma, Kukkuchettan, Chechinma, Febychettan, Kochechi, Kochumouchettan, Kunji, the adorable kids, my cousins Jinu & Anu, Baychachan, Rambhanty, Velyappappa, Velyamummy, Jose uncle and Ramanty. All your prayers, blessings and constant encouragement have enabled me to successfully come through all the struggles and obstacles during the course of my Ph.D.

Finally, I am thankful to ICMR and DBT, Government of India, for my research fellowship and travel grants. I would also like to thank the entire NCCS family and Savitribai Phule Pune University for all the facilities provided to carry out my research work in the NCCS campus.

Thank you all!

Tracy
