ACKNOWLEDGEMENT

I have taken efforts in this study. However, it would not have been possible without the kind guidance and help of several individuals and organizations in India and Thailand. I would like to thank to all of them, particularly Mr. Popatrao Baguji Pawar, the villagers, the village officers of Hiware Bazar Village, India as well as the respondents of Chi River Basin Committee and Mr. Prasit Warnset, the Director of Coordinatation and Watershed Management of Upper Chi river basin, Thailand.

I am highly indebted to Dr. Yanyong Inmuong, an Assistant Professor of the Faculty of Public Health, University of Khon Kean, Thailand who was my advisor when I was doing the Master Degree of Environmental Health in Thailand for inspiring me to continue studying in doctoral degree as well as for his encouragement and support in various aspects to me.

I take this opportunity to express my profound gratitude and deepest regards to my present research guidance, Prof. Dr. Praveen G. Saptarshi for his exemplary guidance, monitoring and constant encouragement throughout the course of the thesis as well as a special note of thanks to his family for warm hospitality and very tasty Indian food. I am also thankful to Dr. Avinash Kadam as my co-guide for the present work.

I am thankful to my Indian friend, Prabhakar Sonwane as the translator and my Thai monk friend, Phramaha Wirat Jaithieng as the photographer for their kindly help in Hiware Bazar Village, India.

Finally, an honorable mention goes to all of my family and relatives, especially my father who has been in the heaven for their understanding, encouragement, and support on me in completing this study.
