ACKNOWLEDGEMENT

I would like to express at the very beginning my sincere and humble gratitude to my respectful Guide Dr. Sundeep Salvi, without whose invaluable suggestions, constructive criticism, effective guidance, continuous encouragement, keen interest and personal affection, I would not have been able to complete my research work.

It is my utmost duty to express my love and thanks to my parents, Mr. Ukim Saetung and Mrs. Juri Lertphikul, my husband, Asist. Prof. Dr. Samran Khansamrong and to all my family members I dedicate whatever merit contains in my work. They have been always morally supportive, cooperative and have affectionately encouraged me in completing this work.

I give my special and sincere thanks to Dr. Chairat Tor Jarern and Dr. Jaras Singkaew Saraphi hospital director, who have given me the best opportunity and full educational support and pushed me to soar greater heights in life. Moreover, the other unforgettable people who have contributed immensely are my co-worker, Miss Poonam Maske, and her family who helped me in collecting data from Indian subjects.

Many of my friends and colleagues have contributed in the preparation of this thesis. I would like to particularly thank Mrs. Vandana Vincent, Mrs. Jyoti Lonhde and Mrs. Sapna Valsa, for helping me with my data collection, analysis and also for giving me insights and suggestions for my work.

I sincerely acknowledge the courtesy of the authorities of libraries, such as, Library of Chiang Mai University, Thailand and Library of Chest Research Foundation, Pune for their cooperation, there by allowing me to access the relevant reference materials while carrying out this study.

Thawari Khansamrong
