**Table 4.1**

Summary of Repeated ANOVA of Stress Scores of cancer patients in Pre test, Post test and Delayed Post tests.

**Table 4.2**

LSD test for significance between pairs of mean Stress Scores of cancer patients in Pre, Post and Delayed post tests.

**Table 4.3**

Summary of Repeated ANOVA of State Anxiety scores of cancer patients in Pre test, Post test and Delayed Post tests.
Table 4.4
Summary of Repeated ANOVA of Trait Anxiety scores of cancer patients in Pre test, Post test and Delayed Post tests.

Table 4.5
Summary of Repeated ANOVA of Total Anxiety scores of cancer patients in Pre test, Post test and Delayed Post tests.

Table 4.6
Summary of Repeated ANOVA of Depression scores of cancer patients in Pre test, Post test and Delayed Post tests.

Table 4.7
LSD test for significance between pairs of Depression scores of experimental of cancer patients in Pre, Post and Delayed post tests.

Table 4.8
Summary of Repeated ANOVA of Subjective Wellbeing scores of cancer patients in Pre test, Post test and Delayed Post tests.

Table 4.9
LSD test for significance between pairs of Subjective Wellbeing scores of experimental of cancer patients in Pre, Post and Delayed post tests.

Table 4.10
Summary of Repeated ANOVA of Physical Symptoms scores of cancer patients in Pre test, Post test and Delayed Post tests.

Table 4.11
LSD test for significance between pairs of Physical Symptoms scores of experimental of cancer patients in Pre, Post and Delayed post tests.

Table 4.12
Summary of Analysis of Covariance (ANCOVA) of Stress scores of cancer patients in post test and delayed post test.
Table 4.13
Summary of ANCOVA of State Anxiety scores of cancer patients in Post test and Delayed Post test.

Table 4.14
Summary of ANCOVA of Trait Anxiety of cancer patients in Post and Delayed Post tests.

Table 4.15
Summary of ANCOVA of Total Anxiety scores of cancer patients in Post and Delayed Post tests.

Table 4.16
Summary of ANCOVA of Depression scores of cancer patients in Post and Delayed Post tests.

Table 4.17
Summary of ANCOVA of Subjective Well-being scores of cancer patients in Post and Delayed Post tests.

Table 4.18
Summary of ANCOVA of Physical Symptoms of cancer patients in Post and Delayed Post tests.

Table 4.19
Mean Values, Standard Deviation of Pretest Stress scores of cancer patients with respect to different types of cancers (one way ANOVA)

Table 4.20
Mean Values, Standard Deviation of Pretest Total Anxiety scores of cancer patients with respect to different types of cancers (one way ANOVA)
Table 4.21
Mean Values, Standard Deviation of Pretest Depression scores of cancer patients with respect to different types of cancers (one way ANOVA)

Table 4.22
Mean Values, Standard Deviation of Pretest Subject Wellbeing scores of cancer patients with respect to different types of cancers (one way ANOVA).

Table 4.23
Mean Values, Standard Deviation of Pretest Physical Symptoms scores of cancer patients with respect to different types of cancers (one way ANOVA)

Table 4.24
Summary of Analysis of Covariance (ANCOVA) of Stress scores of cancer patients in post test and delayed post test with respect to different types of cancers.

Table 4.25
Summary of Analysis of Covariance (ANCOVA) of State Anxiety scores of cancer patients in post test and delayed post test with respect to different types of cancers.

Table 4.26
Summary of Analysis of Covariance (ANCOVA) of Trait Anxiety scores of cancer patients in post test and delayed post test with respect to different types of cancers.

Table 4.27
Summary of Analysis of Covariance (ANCOVA) of Total Anxiety scores of cancer patients in post test and delayed post test with respect to different types of cancers.
Table 4.28
Summary of Analysis of Covariance (ANCOVA) of Depression scores of cancer patients in post test and delayed post test with respect to different types of cancers.

Table 4.29
Summary of Analysis of Covariance (ANCOVA) of Subjective Wellbeing scores of cancer patients in post test and delayed post test with respect to different types of cancers.

Table 4.30
Summary of Analysis of Covariance (ANCOVA) of Physical Symptoms scores of cancer patients in post test and delayed post test with respect to different types of cancers.

Table 4.31
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.32
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.33
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.34
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Religion.
Table 4.35
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.36
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.37
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.38
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.39
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.40
Summary of Multivariate Analysis of Variance (MANOVA) of Stress Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.
Table 4.41  
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.42  
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.43  
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.44  
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.45  
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.46  
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their age.
Table 4.47
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.48
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.49
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.50
Summary of Multivariate Analysis of Variance (MANOVA) of State Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.51
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.52
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their sex.
Table 4.53
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.54
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.55
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.56
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.57
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.58
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.
### Table 4.59
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Religion.

### Table 4.60
Summary of Multivariate Analysis of Variance (MANOVA) of Trait Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

### Table 4.61
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their age.

### Table 4.62
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their sex.

### Table 4.63
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

### Table 4.64
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Religion.
Table 4.65
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.66
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.67
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.68
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.69
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.70
Summary of Multivariate Analysis of Variance (MANOVA) of Total Anxiety Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.
Table 4.71
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.72
Summary of Multivariate Analysis of Variance (MANOVA) of Depression of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.73
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.74
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.75
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.76
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their age.
Table 4.77
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.78
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.79
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.80
Summary of Multivariate Analysis of Variance (MANOVA) of Depression Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.81
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.82
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their sex.
Table 4.83
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.84
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.85
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.86
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.87
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.88
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.
Table 4.89  
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.90  
Summary of Multivariate Analysis of Variance (MANOVA) of Subjective Wellbeing Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.91  
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.92  
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.93  
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.94  
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Religion.
Table 4.95
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Control Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.

Table 4.96
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their age.

Table 4.97
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their sex.

Table 4.98
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Marital Status.

Table 4.99
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Religion.

Table 4.100
Summary of Multivariate Analysis of Variance (MANOVA) of Physical Symptoms Scores of Cancer Patients of Experimental Group obtained in pre-test, post test and delayed post test with respect to their Personal Habits.
