PhD is like a long journey; an experience that takes you through the untraversed path, the green lush meadows and the island of Cyclopes to conquer the final goal fixed in mind. Once we achieve the target and turn back, we realize that all our efforts and the pain were worth going through. The small successes & the serendipitous discoveries, the frustrating failures & unexpected crystallisations, the imparted chemical wisdom & the laboratory camaraderie; they are all important parts of this beautiful journey. But you can’t succeed in this journey without the guidance and support of many.

First and foremost, I would like to express my deep sense of gratitude to my research supervisor, Dr. Wamanrao N. Jadhav (Former HOD, D. S. M. College, Parbhani) for his untiring support, without which I wouldn’t have embarked into the uncharted world of organic chemistry.
