# CONTENTS

## CHAPTER | PAGE NO
--- | ---
1. SOFTWARE QUALITY-SOME PRELIMS | 1
  1.1 Introduction | 1
  1.2 Software Reliability | 8
  1.3 Statistical Process Control | 12
  1.4 Sequential Probability Ratio Test | 21
  1.5 Burr Type XII Software Reliability Growth Model | 22

2. LITERATURE SURVEY AND PROPOSED STUDY | 24
  2.1 Literature Survey and Proposed Study | 24

3. RESEARCH METHODOLOGY | 35

4. BURR TYPE XII SOFTWARE RELIABILITY | 39
  4.1 Introduction | 39
  4.2 Burr Type XII Model Formulation | 40
  4.3 Illustrating the Maximum Likelihood Estimation | 42
  4.4 Illustrations/ Time Domain Failure Data sets | 48
  4.5 Parameter Estimation | 53
  4.6 Method of Performance Analysis | 56
  4.7 Conclusion | 57

5. ASSESSING SOFTWARE QUALITY USING SPC | 62
  5.1 Introduction | 62
  5.2 Proposed Model Description | 64
  5.3 Maximum Likelihood Estimation | 64
  5.4 Time domain Failure Datasets | 69
  5.5 Estimation of Parameters and the Control limits | 70
  5.6 Developing Failure Control Charts | 72
  5.7 Conclusion | 80
6. DETECTION OF BURR TYPE XII RELIABLE SOFTWARE USING SPRT
   6.1 Introduction ...................................................... 81
   6.2 Wald’s Sequential Test for a Poisson Process ............... 83
   6.3 Sequential Probability Ratio Test for Burr Type XII SRGM 86
   6.4 SPRT Analysis of Live Datasets ............................... 88
   6.5 Conclusion ...................................................... 90

7. SUMMARY AND CONCLUSIONS
   7.1 Summary .......................................................... 91
   7.2 Conclusions ..................................................... 93

REFERENCES .......................................................... 95

APPENDIX ............................................................. 116
