ACKNOWLEDGEMENTS

Gratitude is a small word but it conveys a lot of appreciation for what has been done. I express my sincere gratitude to those who have helped me complete my work. First and foremost, the benevolence of the Almighty has helped to steer the research.

Sincere thanks are due to my guide, Dr. (Mrs.) Veena Deshmukh, who provided necessary guidance at every venture, motivated me to think critically and view the whole exercise with the perception of a true researcher. Her quest for perfection has had a lasting impact on me. Similarly her insight, her expertise and her concern have helped me broaden my own view of several related topics.

I am also grateful to the Management and Staff of Pushpanjali College of Education for their constant support. Special gratitude is expressed to Dr. (Sr.) Geraldine, Dr. (Sr.) Margaret, Ms M. Nunes, Ms M. Joseph and Sr. Glancy for all accommodations made during data collection.

Principal Dr. Vandana Maheshwari of Smt. K. K. College of Education and Research and Former Principal Dr. P. Chawda were very encouraging and helpful. So was the entire staff of Smt K. K. College of Education. I express my indebtedness to all of them.

I am also grateful to all the experts who helped in validation of the tools. The Principals of the various institutions I visited during the data collection were very magnanimous to give their time and energy and assist me in data collection. The teachers and students gave their sincere opinions. To all of them I will be ever indebted.

I also acknowledge the support given by C. Branton Shearer and Dr. Thomas Armstrong, who have worked extensively in the field of Multiple Intelligence, for responding to my queries and providing valuable resource material, thus guiding my quest.
The research would not have been complete if not for the constant support that I got from my husband Ronald, daughter Priya, my sister Tina and my in-laws. Their patience, motivation and love have been a source of inspiration all through. I acknowledge all those who have worked in this field earlier as their experiences and the documentation of their research have certainly been of utmost help.

Ms. Agnes D’Costa
