List of Tables

2.1: Percentage gain in efficiency due to $\beta'\beta$ for $p = 5$ for $\rho = 0.25, 0.75$ 28
2.2: Percentage gain in efficiency due to $\beta'\beta$ for $p = 10$ for $\rho = 0.25, 0.75$ 28
2.3: Percentage gain in efficiency due to $\rho$ for $p = 5, 10$ 29
3.1: Percentage gain in efficiency due to $\rho$ over FLS for $p = 5, 10$ 47
3.2: Percentage gain in efficiency due to $\rho$ over SR for $p = 5, 10$ 47
3.3: Percentage gain in efficiency due to $\rho$ over FLS for $p = 5, 10$ 48
3.4: Percentage gain in efficiency due to $\rho$ over SR for $p = 5, 10$ 48
4.1: Percentage gain in efficiency due to $\beta'\beta$ for $p = 5$ for $\rho = 0.25, 0.75$ 66
4.2: Percentage gain in efficiency due to $\beta'\beta$ for $p = 10$ for $\rho = 0.25, 0.75$ 66
4.3: Percentage gain in efficiency due to $\rho$ for $p = 5, 10$ 67
5.1: Percentage gain in efficiency due to $\rho$ over FLS for $p = 5, 10$ 86
5.2: Percentage gain in efficiency due to $\rho$ over SR for $p = 5, 10$ 86
5.3: Percentage gain in efficiency due to $\rho$ over FLS for $p = 5, 10$ 87
5.4: Percentage gain in efficiency due to $\rho$ over SR for $p = 5, 10$ 87
6.1: Data on population under poverty line and related variables 98
6.2: Descriptive statistics of the sample data 100
6.3: Predicted PUPL 100
6.4: Results of OLS estimation 101
6.5: The correlation matrix of the variables in SAR model 101
6.6: Global Moran’s $I$ values 102
6.7: Infant mortality rate, Female literacy rate, Percentage of immunized children, and Per capita net state domestic product in major states of India 103
6.8: Total fertility rate, Female literacy rate, Headcount poverty ratio, and Percentage of urban population in major states of India

6.9: Predicted IMR

6.10: Predicted TFR

6.11: Results of OLS estimation for IMR

6.12: Results of OLS estimation for TFR

6.13: Correlation matrix for IMR

6.14: Correlation Matrix TFR

6.15: Global Moran’s I values

6.16: Global Moran’s I values

6.17: Estimates of IMR and TFR
