ACKNOWLEDGEMENTS

Since these are the pages in the beginning of this Thesis, but this was my last remaining task, to acknowledge all those people that have contributed to this work described in this thesis. This was an impossible task, given the many people that have helped to design, implement, apply, criticize, and evangelize the work. I am going to try anyway, and if your name is not listed, rest assured that my gratitude is not less than for those listed below.

First of all I feel that words can not do full justice in expressing a deep sense of gratitude which flows from my heart towards my esteemed and learned Supervisor Dr. Ran Singh (Associate Professor, Department of Mathematics, DAV PG College Kanpur) under whose benevolence and able guidance I did this work. His unsparing help and precious advice have gone into the preparation of this thesis and I shall not be able to repay all those I have gained from him.

I am also completely indebted to my parents Sri Prem Babu Saxena and Smt. Pushpa Saxena for their blessings and patiently cooperating to see this Thesis to be completed.

I am particularly indebted to Mr. Gauravendra Swarup (Joint Secretary, Dr. Virendra Swarup Educational Foundation, Kanpur) and Mrs. Sharmila Nandi (Director, Dr. Virendra Swarup
Educational Foundation, Kanpur) for their encouragement at the very outset of this Research work.

I am specially very grateful to my friend, philosopher, guide Mr. Ranjit Singh, who actually motivated me to start this research work and helped me at every moment of this work from very beginning till the end.

I will remain always thankful through my heart and soul to Dr. S.S. Pandey (Principal, Dr. Virendra Swarup Institute of Computer Studies, Kanpur & former Head, Dept. of Mathematics, DAV PG College, Kanpur) who unconditionally helped me, throughout this project, at various technical stages.

Other than all those respectable persons, whom I have addressed above, my very special thanks goes to Dr. Peeyush K. Saxena (CSJM University, Kanpur), whose moral support and constructive criticism always helped me to do my work better. His emotional support at every step during entire research work helped me a lot to see this day to come in my life.

Today I feel that I should mention all those teachers of Mathematics in the past, which have shaped my life as I am today. These respectable teachers are Mr. S.N. Mishra, Mr. J.P. Mishra, Mr. G.L. Tripathi, Mr. T.N. Tandon, Dr. S.S. Pandey, Mr. K.P. Gupta, Dr. G.P. Bhargav, Dr. R.G. Gupta and Dr. S.S. Gupta.
I am also thankful to Dr. Arvind Singh, Mr. Kirtesh Pandit and Mr. S.K. Sinha.

I am highly indebted to the authorities of DAV PG college Kanpur, specially former principal Dr. Ashok K. Saxena and existing principal Dr. Rekha Sharma, for their kind support to organize this work in the campus. I am also thankful to the (Late) Dr. R.P. Srivastava (Head, Dept. of Mathematics, DAV PG college, Kanpur), for his all cooperation and support as far as my research work is concerned.

I owe a deep sense of gratitude to the authorities of the Library at IIT Kanpur and other institutions for providing me research facilities.

I can not complete this acknowledgement without mentioning the name of my wife Mrs. Arti Saxena, who patiently sacrificed so many moments, to wait for this day to come in our life. When the interests go beyond the boundaries of selfishness then I would like to mention the names of my caring sisters, Mrs. Renu, Mrs. Reena and Mrs. Reema Saxena.

I also want to mention the unknown sacrifice made by my little daughter "Devna" who still very small to understand what her father was always doing on his computer and not playing with her.
In the end I want to give the words of thanks to my friend Mr. Sher Pal Singh who helped me in various technicalities of this research work therefore I am able to represent this entire work in this form.
