ACKNOWLEDGEMENT

This thesis entitled "Certain Harmonic Univalent and Related Functions" gives the details of the background and the research work done by me on the topic approved by C.S.J.M. University Kanpur.

First of all, I wish to express my deep sense of appreciation and gratitude to my thesis supervisor, Dr. Ran Singh (Associative Professor) Dept. of Mathematics, D.A.V. College, Kanpur for his excellent guidance and able supervision. I doubt if I could have ever completed this arduous assignment without his perpetuated interest, continuous motivation, indulgent involvement and consummate command over all the nuances of my research work.

I wish to express my sense of appreciation to Dr. Prabha Sharma (retired Professor), Dept. of Mathematics & Statistics, IIT Kanpur, for the encouragement and help she gave me during past six years as a mentor including many instances of my stay at IIT Kanpur for attending several conferences, workshops, courses and ATM schools. Her moral support and helpful suggestions have been of vital importance to me during the course of my whole thesis work. I am also grateful to Prof. G.P. Kapoor and Prof. Arbind Lal from IIT Kanpur for their teaching and guidance. I gratefully acknowledge Professor P.K. Kalra, Director, IIT Rajasthan under whose able supervision I worked as a project associate on a number of sponsored
research projects as a mathematical algorithm developer in the
department of electrical engineering IIT Kanpur.

Above all I would like to express heart felt and affectionate
grateful gratitude to my parents for their support and blessings, specially to
my father, whose affection and blessings have consistently
empowered me, which is beyond the scope of any acknowledgement
but I make an effort to express my heartily gratitude to them. I am
finding myself incapable of expressing my gratitude to my elder
sisters Mrs. Rashmi Mishra, Mrs. Arpita Tiwari and brother Alok,
who supported and encouraged me to carry out this work. Besides
this I feel happy to mention little masters Krishna and Parth with
whom I had lots of fun filled moments to refresh myself. I pay my
gratitude to my grandparents (Late) Shri S.N. Agnihotri, (Late) Shri
B.N. Mishra and my father-in-law (Late) Shri Shahid Husain &
mother-in-law Mrs. Amina Shahid for their lots of blessings and
moral as well as spiritual support. I also thank Mr. Ambrish Mishra
(brother-in-law) for his valuable suggestions and Irshad Ali for his
love and care as a brother. Once again I pay gratitude to my parents
for their silent support, inspiration and good wishes.

I fell compelled to record my warm appreciation to my bosom
friends Subhashree Mohapatra, Arbaz Khan, Naveen Srivastav and
Vivek Sangwan with whom I have found memories of the time spent
together in their sweat and inspiring company full of colours. I
greatly acknowledge Dr. Dwijendra N. Pandey, his wife Karuna
Pandey and Aadi for their love, wonderful homely support and encouragement during my stay with them as neighbours cum family members. My special vote of thank goes to Dr. Javid Ali who has been extremely helpful to me as a brother and as a motivator to make this work possible.

Finally, my deep sense of appreciation to my loving husband Akhlaq Husain, who has been perennial source of encouragement for me during the course of the present work. He has been instrumental in fostering an environment which is conducive to research. I express my sincere gratitude, regards and thanks to my better half for his guidance, worthy suggestions, monumental patience, forbearance, perfect understanding and help at all the stages. Without his whole hearted cooperation this research work would not have been possible so smoothly.

I express all my deepest love and affection to my little sweet daughter Zinia whose presence and lovely, innocent activities not only make me feel happy and proud but means everything to me and complete my world.
