Contents

Chapter 1. *Introduction and preliminaries.* 1-72

Chapter 2. *Certain subclasses of uniformly p-valent starlike and convex functions.* 73-99

Chapter 3. *Subclasses of spirallike functions defined by Ruscheweyh derivatives.* 100-121

Chapter 4. *Univalent functions with negative coefficients using Ruscheweyh derivatives.* 122-145

Chapter 5. *New subclasses of harmonic univalent functions.* 146-167

Chapter 6. *Certain subclasses of harmonic univalent functions with negative coefficients.* 168-190

Chapter 7. *Harmonic univalent functions with negative coefficients using fractional calculus operator.* 191-206
