ACKNOWLEDGEMENT

This thesis is a collection of work on the Structural and Electrical Properties of CVD grown Carbon Nanotubes.

I would like to thank my thesis supervisor Dr R. S. Yadav, Reader, Department of Physics, DAV (PG) College, Kanpur for constant support and guidance during this work. Without his encouragement this thesis might never have been realized.

I thank for the support from IIT Kanpur for providing me facilities to prepare and characterize samples using Raman, SEM, Spectrometer and AFM.

I also express my gratitude to Dr Rekha Sharma, Principal, and other faculties & staff members of Department of Physics, DAV (PG) College, Kanpur for their helpful attitude.

Any formal words like thanks etc, is too weak to carry my feelings of thanks and gratitude towards my husband, Mr S K Singh for his perennial inspiration and continuous encouragement.

It is impossible to ignore the support by Amit, my son and Gauri, my little daughter during the time this work was in progress.
also at times making unreasonable demands on their resilience and patience is highly appreciated.

I thank my father Dr J N Singh and mother Mrs Shobha Singh and other family members, relatives and friends and all others who shared my life and kept me in good company over the years of this work.

I wish to thanks all teaching and non teaching staff members of DAV College, Kanpur for their kind cooperation and to help during my research work.

Date: 21.04.09
