ACKNOWLEDGEMENT

First and foremost I express my sincere gratitude to Dr. Anokhe Lal Pathak for his valuable guidance and support rendered over years in enabling me to do my research along with my occupational responsibilities.

I am extremely grateful to Dr. A. K. Misra, BHU, for making me well conversant with mathematical modeling in epidemics and also steering my efforts towards the assimilation and acceptance of new simulation techniques. Without his professional as well as personal support, my earnest endeavors would not have been fruitful.

I am deeply indebted to Prof. Peeyush Chandra for inspiring me to go for research in the modeling field and for the proper guidance he provided me in Summer Research Fellowship Programme 2010 of IASc-INSAs-NASI.

I owe my special thanks to Dr. Vivek Kumar Dwivedi for his active support which facilitated the accomplishment of this arduous work.

I extend my thanks to all my colleagues, especially Dr. NNC Awasthi, Dr. Y. A. Roomi, Dr. Mahendra Singh, Dr. Navneet Misra, Dr. Suneel Singh, Mr. A. C. Pandey and Dr. Manju Purwar for their constant motivation and relentless support for my Ph. D.

I take this opportunity to thank Dr. Yageshwar Mishra, Sri Vipin, Smt. Vinti, Sri Nagesh, Smt. Meenu and Ms. Pallavi and Smt. Shalini for keeping me under constant positive pressure for the relentless pursuit of my goal.

I am also grateful to Sri U.S. Shukla for his help, support and encouragement to do better since my university life till date.
I am very much thankful to the family of Dr. A.K. Misra and his students Vishal, Anupma and Kusum for their support and assistance during my stay at Varanasi without which thesis has not come into existence.

I would also like to thank my brother Vishal, sister Vineeta, Kaushlendra ji and Prof. P. R. Misraji for their support during my research work.

It is a pleasure to thank Ravi, Partha, Ambuj and Surabhi for their help and support in many ways.

I would like to pay special thanks to (late) Sri B.P. Shukla and Smt. Rama Shukla for their best wishes and blessings.

This thesis would not have been possible if my beloved wife Santavana and daughter Chinmayee perfectly supported me emotionally and physically. Great thanks for both.

It is an honor for me to acknowledge the systematic support, hearty help, enthusiastic encouragement and participatory pursuits of friends like Dr. Vipitya, Sri Brajesh Kumar (IFS) and Dr. Prashant Kumar Srivastava in this entire work.

Lastly, I offer my regards and blessings to all of those who supported me in any respect during the completion of the thesis.

SATYA NARAIN MISHRA
