Acknowledgement

Those who have dedicated their life to the field of research or have successfully carried on research in any academic sphere realize the importance of guidance extended to research students who are completely no voice in the field. Guide's pain taking perseverant and sincere supervision have led many a fellow truly like myself to express a complete sense of gratitude to my guide Dr. K. K. Srivastava, Reader, Department D.B.S. College, Kanpur, through words in this monograph is absolutely impossible, for it is more a matter of realization than expression.

I am very much indebted to Prof. Ashok Kumar, Head, Department of Physics, H. B. T. I. Kanpur for taking keen interest in discussing the research problem and helping in many places.

My thanks are also due to Dr. S. K. Mishra, Principal, and Dr. B. P. Singh, Head, Department of Physics, D. B. S. (P. G.) College Kanpur, who helped me for providing the research facilities in the department.

This acknowledgement would be incomplete if I fail to express my thankfulness to all my seniors, colleague and friends of the department for their cordial co-operation. I am also obliged to Mrs. Kirti Srivastava, Wife of Dr. K. K. Srivastava for her kind hospitality during discussion at home.

Overwhelmed with emotions and sentiments, I am unable to express my sense of obligation for filial encouragement received from my father Sri Vinay Khanna, Mother Smt. Roopa Khanna and my husband Sri Punit Mehrotra. My respect is also due to my Father in Law Shri V. K. Mehrotra and Mother in Law Smt. Neelu Melhotra and all other members of my family to enlighten and inspiring me during this research work.

Dated 9 May, 04

Smr. Arti Khanna.
