ACKNOWLEDGEMENT

I take this opportunity to express deep sense of gratitude and highest regards to my research mentor and Principal of Shantilal Shah Engineering College, Bhavnagar Prof. Dr. Mangal G. Bhatt for his inspiring, encouraging and demonstrative guidance, right from commencing of research with literature review and identification of the objectives till completion of the Ph. D. work. Without his constructive suggestions, novel ideas, wise counselling and correcting measures this report would not have been brought to this form. He has been constantly monitoring and evaluating progress made within specified timeframes of my work at various stages. I am thankful to him for imparting in me the qualities of being calm and meticulous at every stages of the research work. I acknowledge my indebtedness to him for his contribution for this significant accomplishment of my life.

Results derived from feedbacks of respondents on questionnaire owe their value and reliability to the factual, conceptual and willing responses offered by experts from Industries and Academics. I am heartily thanking all respondents who had the patience to fill in the data, the curiosity on the nature of work, and for sparing their valuable time.

I am also very thankful for the Commissionrate of Technical Education, Gujarat for providing opportunity by granting permission to carryout research and thereby update my knowledge. I commit to pass it on to students in years to come.

My humble thanks are due to the R. K. University, Rajkot for providing me an opportunity to carry out this research work as registered Ph. D. Scholar, which provided platform for continuously appearing in doctoral monitoring committees, which added value at various stages of the work. I am indebted to the management and experts of monitoring committee.

At this stage, I cannot forget my senior colleagues who had been motivators at losing time. It would be injustice if I don’t mention some names of friends, students and administrators who helped during my work but, it
would be more injustice if I miss some of them. So, I heartily thank them all who have directly or indirectly extended helping hands.

There was continuous support from my family and extended family members throughout my pursuit for the study. Especially my son has been showing maturity at his innocent age that had motivated me to keep on my studies in every situation. I fully bow forward to my better half who had been a supportive and emotional partner during this important time of life. I would like to thank my Bhai-Bhabhi who had always shown a way of purity and honesty that had made me intellectually strong throughout the course of this research work. I am fortunate enough to thank two mothers- maternal and in-law, who relaxed me from the responsibilities of home at critical times and making me free to be busy with my research work. The morale support from my father has kept me strong in critical times, so I am grateful to him. I would like to thank all my relatives, who helped me in different categories- motivating, commenting, alerting, and even correcting mistakes and contributing to my efforts.
