ACKNOWLEDGEMENTS

I am grateful to my thesis supervisor Dr. Bansi Lal for introducing me to the field of laser heated pedestal growth of organic optical materials, his able guidance, his keen interest and constant moral support at every stage of this research.

I am grateful to Dr. K.V. Rao of A.C.M.S. for his help during the initial stages of this work.

Financial support provided by CSIR, New Delhi through the research projects granted to Dr. Bansi Lal is gratefully acknowledged.

I wish to express my thanks to my other colleagues in the laboratory namely Pradeep, Sumit, Archana, Satyendra, Sasmita and Humyra for providing wonderful working environment and for their help and encouragement. I am grateful to my friend Archana Kushvaha for her suggestions and encouragement. The technical and other help provided by Pushkar (even on holidays and after normal working hours) is gratefully acknowledged.

I would like to thank Shri Maharaj Singh and Shri V.K. Bajpai of Centre for Laser Technology, Shri Omprakash of Department of Physics and Shri U.S. Singh of Advanced Center for Materials Science for their invaluable technical help in the thesis work.

Thanks are due to Mrs. Sheela Koul (spouse of Dr. Bansi Lal) for her encouragement and hospitality.

Mere words cannot express my special thanks to my husband, Nagendra for his love, understanding and constant encouragement. My special thanks to my daughter, Ashi for making our monotonous life happy with his sweet activities.

Last but not least I express my gratitude to my family for their inexhaustible support and patience during the course of this study. They did everything to make my life easier.

(Shivani Singh)
