ACKNOWLEDGEMENT

It gives me immense pleasure to express my deepest gratitude and sincere respect to all of my teachers who have been torch bearers at all levels of education from school to college and specially at H.B.T.I.

I am especially indebted to Dr. A.K. Srivastava for his inspiring and unfailing guidance without which this work perhaps could not have been completed. For baptising me into the field of organic chemistry, for his unstained guidance and for imparting a thorough knowledge of the subject, I find no words to express my feelings of gratitude towards him. Dr. Srivastava is more than a research guide to me in every respect and he has been a perennial source of inspiration. His constant encouragement and constructive criticism which I received from time to time and his personal interest which he took in my work and welfare have been the sustaining factor during the reconstruction and compilation of this monograph.

It's my pleasant duty to acknowledge my thanks to Prof. R.S. Tewari for his kind help.

I take opportunity to thank Drs. G. Chandra, P.C. Dwivedi, S.K. Upadhyaya, D.K. Singh and the departmental staff for their much needed co-operation.
I acknowledge extreme utility and importance of many informal discussions and fruitful suggestions with Drs. G.N. Mathur, J.S.P. Rai and U.N. Dwivedi of Plastics Technology Department.

I gratefully acknowledge Drs. B.D. Gupta, B.S. Rawat, A. Ali, A.K. Banga, P.D. Dixit, Rama Agarwal; Mr. R.R. Bhatnagar and D.K. Agarwal for their encouragements.

Much of the gratefulness would be lacking if I do not acknowledge my thanks to my senior Mr. Akshay Kumar Shukla for his pleasant association and helpful concernness about my being present in the lab and in the progress without which I would not have completed this monograph so early.

A lot of my sincere thanks are also due to my intimate collaborators Paritosh Kumar and Shailendra Nigam for their deep affection, indispensable co-operation and brotherly attitude.

I am very much grateful to my friends who directly or indirectly helped me in both academic and non academic matters. Worth mentionable names are Neelam Mahrotra, Nalini Gupta, Anita Bajpai, Veena Chauhan, Nishi Sharma and Anjana Darbari.

My thanks are also due to Mr. Nayab Ahmad for spectra and elemental analysis, Mr. J.C. Verma for drawings, Mr. Anil Johri for elegant typing and Mr. B.N. Shukla for immaculate cyclostyling work.
The author takes pleasure in expressing her indebtedness to Dr. A.K. Vasishtha (Director, H.B.T.I., Kanpur) for providing research facilities and encouragement. My entire acknowledgements will be incomplete if I do not extend my thanks to CSIR, New Delhi for their financial support as senior research fellowship.

Last, but not the least, I wish to express my deep appreciation to my beloved parents, brothers, sisters, uncles, aunts, (Mrs.) R. Srivastava and grandparents for their constant encouragement and moral support to educate me upto this level and thus bestowed upon me the boon of knowledge.
