ACKNOWLEDGEMENT

I express my sincere thanks and gratitude to Dr. A.K. Vasishtha, Director, H.B. Technological Institute, Kanpur for his unfailing help, keen interest and encouragement that enabled me to undertake and complete this research as well as present this doctoral thesis.

My sincere thanks with a deep sense of gratitude are due to Dr. P.N. Maheshwari, Assistant Professor, Department of Biochemical Engineering and Food Technology, H.B. Technological Institute, Kanpur for his preserving guidance and encouragement during the entire course of my work. His tireless devotion provided extra support in achieving my goal.

I am grateful to Dr. S. Chandra, Sri R.K. Khanna, Sri R.P. Singh, Sri J.P. Pathak, Sri R.K. Trivedi, Sri P.K. Tewari, Dr.(Mrs) Madhu Bajpai, Dr.(Mrs) Sandhya Pandey and Dr.(Miss) P.A. Naqvi for their valuable suggestions.

I thank all my friends and colleagues who helped me in every possible way.

M/s Hindustan Vegetable Oil Corporation, Kanpur provided samples of some of the experimental materials and the Directorate of Vanaspati, Vegetable Oils and Fats; Ministry of Food and Civil Supplies; Government of India, New Delhi provided the necessary financial support for this research.
