ACKNOWLEDGEMENTS

It is my great pleasure to express my deep gratitude towards my able and highly competent guide, Dr Ashok Kumar, who illumened me at every step on my way to solve the numerous intricate problems of my theme of research. I will ever remain grateful to him for having inculcated in me the spirit of hard work. I am also very much indebted to Dr J.S.P. Rai, who very kindly permitted me to work on DSC instrument in his laboratory. He always took keen interest in my research work and gave his valuable suggestions, which helped me a lot throughout the course of my research. Further I consider it my moral duty to pay thanks to Dr A.N. Nigam, who provided me all types of facilities in my research campaign.

At this place it seems to be very necessary to express my gratefulness to one of my senior colleagues, Dr D.C. Dwivedi, as well, who always helped me in various ways in the completion of this work. Again a few words of thanks are also due to all my research colleagues, Dr Sangeeta, Dr S.K. Tripathi, Dr A.K. Agnihotri, Dr Renuka, Mrs. Renu, Mr. K.K. Srivastava, Mr. R.K. Shukla, Mrs. Manjul, Mr. P. Dwivedi, Mr. S. Kumar and Mr. S. Srivastava, who helped me from time to time in many ways.
Finally I feel it my spiritual obligation to express my inestimable indebtedness to my parents, who although inspired me to take up new challenges. They made incalculable efforts in bringing up my capability to initiate this work. My special thanks are due to my younger sisters as well for their cooperation during all this time.
