“All praise for the Almighty, the ultimate being”

PhD is a sojourn wherein contentment with dissatisfaction along with intricate humdrum prevails. But, its essence lies in the accomplishment at the end which is ignited by interdependence rather than dependence. Though it is simple to list down all the people who lent their support for the accomplishment of my endeavor but it is rather difficult to gratify them. Nevertheless I will attempt...... I feel overwhelmingly ecstatic and fortunate enough to seize the gracious opportunity to have worked under the august guidance of Dr. Sanjay Batra, Scientist E-I, Medicinal and Process Chemistry Division. Undoubtedly, words can’t suffice in expressing my sincerest gratitude towards him. His cordial behavior, humble attitude, generous mood, friendly nature, cooperativeness and magnanimity are some of the exquisite traits which I would certainly like to cherish and emulate. Be it the basic chemistry, synthetic, or combinatorial chemistry, his trenchant critiques and probing questions are highly acclaimed. He is a man of high caliber with inborn positives which have laid a deep rooted impression in me. While working under him, the meticulous execution of his work has instilled in me a great sense of confidence to carry out my work objectively and successfully.

I express my sincere thanks towards Dr. R. Tuli, Director, CDRI and the Ex-Director Dr. C. M. Gupta, for providing me an opportunity to work and avail research amenities at CDRI.

I am thankful to the Dr. A. K. Saxena, present Head, and his antecedent Dr. C. Singh of Medicinal and Process Chemistry Division, CDRI, for providing me the necessary departmental facilities. I am also thankful to all the scientists, staff and colleagues of Medicinal and Process Chemistry Division for their help and co-operation during this dissertation work.
I put into words my sincere thanks to Dr. B. Kundu, Head, Combinatorial Chemistry unit, for his guidance and fruitful discussions and for providing me free access to the combinatorial facilities during my tenure at CDRI.

I am indebted to Dr. R. Roy, Ex-Head of NMR unit, SAIF and Dr. A. Arora, Scientist E-I, Division of Molecular and Structural Biology, for not only providing the 2D-NMR spectroscopic data but also for the necessary discussions when needed. I am also thankful to Dr. P. R. Maulik, Scientist E-II, Division of Molecular and Structural Biology, for providing me the data of the X-Ray crystallographic analysis.

I overwhelmingly acknowledge the services rendered by SAIF, CDRI, for providing the spectroscopic and analytical data. I am thankful to Mr. S. Kanojiya for carrying out detailed mass-spectral studies and Mr. Harsh Guniyal and Mr. Ashok Pandey for carrying out detailed 2D-NMR experiments. I also express my thanks to Dr. A. K. Mandwal for providing the analytical data from Combi-Chem unit and Mr. Raju Arora for his technical assistance.

I am highly grateful to Dr. S. Sinha, Head, Division of Biochemistry Dr. A. Gaikwad, Scientist B, Division of Biochemistry, Dr. P. K. Shukla, Scientist E-II, Division of Fermentation Technology, Dr. Gopal Gupta, Scientist E-I, Division of Endocrinology and Dr Kumkum Srivastava Scientist E-I, Division of Parasitology for providing data of various biological assays.

I feel fortunate enough to have the company of Amrendra K. Roy, Dr. Rashmi Saxena and Richa for their moral support, constant encouragement and co-operation during accomplishment of my task. I could barely miss the memorable and invaluable company of my laboratory colleagues Dr. Zehra Tusi, Sudharshan, Somnath, Virender, Divya, Amita, Samiran, Devesh, Sunil, Piyush and Sudhir for their generous support, fruitful suggestions and for keeping a very cheerful environment in the lab.
Friendship is an inexhaustible asset which I acquired by having the unforgettable company of my cherished friends especially Sanjay, Prince, Nobul, Krishnapal, Ravi, Gaya, Biswajit, Uma, Ved, Ram, Vikas, Tanveer, Shiva and Rajeev for their help and support whenever I needed.

I am highly indebted to Archana, Joshi, Purohit, and Deepak (IIT Kanpur), Shiva Swaroop (NCL Pune) and Rakesh, Scientist (DRDO Kanpur) for their support and for providing me the research articles and Sci-Finder searches whenever needed.

I owe my heartfelt thanks to my brother Dr. rer. nat. Munendra Singh, Professor, Department of Geology, University of Lucknow for his tremendous moral support, motivation and constant encouragement all through my life.

I am thankful to Ashok and Ashish for their immense love and support. The driving force for the accomplishment of my endeavor is my family. I thank them for their care, moral support and affection. Without them, it would have been nearly impossible for me to give my work the present silhouette.

The financial assistance from DST and CSIR in the form of fellowship is gratefully acknowledged. Travel grant and financial assistance from DST and DFG to attend the Lindau meet with Nobel Laureates at Lindau, Germany is also acknowledged.

Last but not the least, I would like to offer my sincere gratitude and obeisance to the invincible creator, with whose grace and kindness I stand today in achieving my ambitions and desires.

Vijay Singh
