ACKNOWLEDGEMENTS

Words truly are inefficient for expressing my deep sense of extreme gratitude to my learned guide Dr. P.N. Agarwal, M.Sc., Ph.D. (Wisconsin), Dy. Chief Scientific Officer, Defence Materials and Stores Research and Development Establishment (DMSRDE), Kanpur, now retired, whose scholarly direction, constant encouragement and continued guidance have proved of immense value to me at every stage of this work. Needless to mention that inspite of my Herculean efforts, this work could not be initiated and consummated without the worthy guidance of Dr. P.N. Agarwal.

Equally valuable has been the inspiration provided to me by the patronising attitude and encouraging words of my then Principal Dr. (Mrs.) Hem Lata Swarup, whose function was very well carried on by my present Principal Dr. (Mrs.) S. Taneja, as she continued adding to my inspiration and enthusiasm for completion of this study which was taken up solely on the strength of the energy imbibed from the radiant personality of her dynamic predecessor - Dr. (Mrs.) Hem Lata Swarup, now the worthy Vice Chancellor of the Kanpur University.

I wish to record my thanks to Late Dr. H.B. Mathur, the then Director, DMSRDE, Kanpur and to Dr. Nitya Nand, F.N.A., Director, Central Drugs Research Institute (CDRI), Lucknow, for providing necessary facilities for carrying out
the present work. I am also thankful and obliged to University Grants Commission, New Delhi, for the necessary financial assistance and award of Teacher Fellowship under F.I.P. during the tenure of which the present work was completed.

I am also obliged to the entire staff of Microbiology group of DMSRDE, Kanpur in general and to Mr. H.M. Dayal, in particular for training me in the basic techniques required for initiation of the present work.

I am extremely grateful to Dr. S.N. Ghatak Assistant Director, Biochemistry Division, C.D.R.I., Lucknow, for his untiring help and valuable suggestions for the completion of the work and also to Dr. O.P. Shukla, Scientist, Biochemistry Division, C.D.R.I., Lucknow, for his constant help and co-operation.

My sincere thanks are also due to all the members of Biochemistry Division, C.D.R.I., Lucknow and especially to Dr. (Miss) Sushma Rathore for her invaluable help.

I am sincerely thankful to all the members of Chemistry Department of A.N.D.M.M. College, Kanpur, who have been of invaluable help to me and in this connection, I would like to make special mention of my colleagues, Mrs. M.B. Saxena, Dr. (Mrs.) S. Mallik and Mrs. U.K. Tiwari.

I am extremely thankful to all my well-wishers and friends who came with a helping hand most readily as and when their assistance was needed during the course of this study.
In fine, of the most far reaching importance are the noble souls of my deceased parents to me, whose silent blessings have afforded me with the good sense to take up this study. Equally significant has been the ungrudging co-operation and efforts of all my family members, my sisters and my brother-in-law without which this work could not be begun and completed. I, therefore, express my gratitude to my deceased parents and to all my family members.

Priti Pathak
