ACKNOWLEDGEMENT

I express my sincere sense of gratitude to Dr. G.N. Mathur, Ex-Prof. and Head, Department of Plastics Technology, H.B.T.I., Kanpur, for his keen interest, painstaking guidance, and constructive suggestions for the completion of this work.

I take this opportunity to express my gratitude and indebtedness to Dr. D.A. Dabholkar, Director, Shriram Institute For Industrial Research, Delhi for his valuable guidance, suggestions, comments, and healthy criticism throughout the duration of this work. Dr. D.A. Dabholkar, in fact, inspired me to undertake this study, provided all the facilities and helped me immensely throughout the course of this work.

I wish to acknowledge prof. S.V. Kessar, Director, R.S.I.C, Punjab University, Chandigarh, Prof. V.B. Gupta, Head, Textile Department, I.I.T Delhi and Dr. S.C. Maitra, Assistant Director, E.M. unit, C.D.R.I, Lucknow for providing the facilities of Amino acid analyser, Scanning electron microscope and Transmission electron microscope-available at their respective institutions. I am also grateful to Khadi Ashram Amritsar, Venus Textile Mill, Delhi, River View Mill,
Almora and Saraswati Woollen Mill, Sirkhet for extending their different yarn processing facilities for carrying out this work.

My sincere thanks are due to my colleagues, Dr. J.S. Rawat, Dr. Neeraj K. Gupta, Mr. N.N. Saxena and Mr. R.K. Khurana for their valuable suggestions and help rendered from time to time. I also take liberty to gratefully acknowledge my wife Rachna Tyagi for her cooperation, moral support, patience, and encouragement during the course of this work.

I am thankful to Mr. Pushkar for typing this thesis. Thanks are due to Indian Council of Agricultural Research for sponsoring this research project at Shriram Institute For Industrial Research, Delhi.

(AJAY KUMAR)
