Acknowledgement

I would like to express my gratitude and appreciation to Almighty Allah for making it possible for me to write this Ph.D. Thesis.

I would also like to thankfully acknowledged the support, guidance of my Supervisor/Guide in person of Associate Professor Dr. Sanjeev Kumar, and my Co-Supervisor/Guide Associate Professor Dr. S.P. Singh, for their passion and tireless motivation during the course of this Thesis, from the beginning to the final stage, despite their level of commitment and different tight schedules but are always there and ready to attend and advice accordingly. My gratitude and appreciation goes to Professor Sanjaya Kumar Das, all the participants that completed the surveys and participated in the interviews that provides the primary data for this Thesis, Nims University Rajasthan-Jaipur for given me the enabling environment, Directorate of Research as well as Federal University Dutse my employer for given me the opportunity to further my studies, my colleagues in the Department of Information Technology and all the faculty members of Faculty of Computing-FUD.

Moreover, my special appreciation goes to my parents, wife, children, family and relatives, friends and colleagues most especially Dr Abubakar Mohammed, Dr Yunusa Hassan, Dr Nura Tijjani Abubakar for their supports, prayers and encouragement throughout the Program.

Lastly, would also like to acknowledge Mukhtar Ishaq, Bashir Mukhtar, Suleiman Ibrahim, Ahmad Sani Kazaure, Abdulkadir Kassim, Abdullahi Aminu, Muhammad Abba Musa, Ibrahim Saleh-Abuya, Hayatu Shuaibu and all that helped in one way or the other in making this PhD a reality, I really do appreciate you all.
