ACKNOWLEDGEMENT

I would like to express my sincere gratitude to everyone who has contributed to this thesis and supported me throughout this amazing journey.

My first and foremost thanks go to my supervisors Dr. Rajesh Kumar and Dr. Vijayender Bhalla and they are possibly the only reason I am writing this Thesis and this note of thanks. They believe in my abilities and gave me the responsibility to carry out this project. This thesis was not such an easy task without their help. Especially I want to thank Dr. Bhalla for providing me everything that I ever desire to pursue my research interests. He had provided me countless suggestions that helped me to nurture my scientific aptitude. Invaluable discussions, long brainstorming sessions and unbelievable criticism especially when the experiments were not working as planned really help to shape this thesis and I am not sure if I could ever express how grateful I feel for this.

Words are so limited to acknowledge Dr. Rajesh Kumar in this thesis. He has been not only a mentor and an advisor, but also a friend and, often, a confidante. At the risk of stating the obvious, I would like to place on record my debt to him for selecting me as a doctorate candidate and for allowing me to work with others independent of him. Apart from being an example of how an academician should approach his work, he has shown me what it means to have infinite patience, propriety and encouragement for all always with a smile.

I am extremely grateful to Dr. Girish Sahni (Former director CSIR IMTECH) and Prof Renu Vig (Former Director UIET) for allowing me to work in the prestigious lap of CSIR-Institute of Microbial Technology. This thesis wouldn’t be possible without their permission.

I express my gratitude to Dr. P. Anil Kumar (Scientist MTCC IMTECH) for extending all the facilities of his lab to me and for providing me funding. I would like to thanks Dr. C.R. Suri, Dr. E. Senthil Prasad, Dr. Javed Agrewala, Dr. Girish Varshney and Dr. Binod Kumar for their valuable discussions.

I also extend my thanks to my other lab mates Virendra Nishad, Megha Chaudhry, Bharti Sharma, Saloni kakkar, Manisha Thakur, Dr. Parveen, Shilpa mam, Preeti mam,
Adity mam, Monu mam, Bhawana, Kalyaan vaid, Jai, Vikas sir, Vivek sir and Mangeet sir both at IMTECH and UIET.

My achievements and outcome will be void without a special gesture to my lovely team mates and friends Monika, Ritika, Swati mam, Ruchi mam, Manhar Singh, Jyoti, Sumit, Nidhi, Navjot Singh, Shweta, Shivani, Zora Singh and Parminder Singh.

It was the patience and silent sacrifice of my parents Sr. Hira Singh and Smt. Simarjit Kaur which led me to complete this task. Words fail to express appreciation to my wife, Komaljeet Kaur and lovely family members Sukhwinder, Gurpreet and Gurbhej. Their patience, inspiration, suggestions, constant encouragement and moral support have helped me realize my aspirations.

Pargat Singh
