3.3.6 Technology Development and R&D ... 54
3.3.7 Competition Aimed at Consumer Benefits ... 55
3.3.8 Energy Conservation ... 56
3.3.9 Training and Human Resource Development ... 56

3.4 The Concept of Performance and Its Measurement ... 56
3.5 Approaches of Performance Measurement ... 59
3.6 KPI Approach of Performance Measurement ... 60
   (a) Financial Performance ... 61
   (b) Customer Service Quality ... 62
   (c) Reliability ... 62
   (d) Efficiency in Operations ... 63
   (e) Sustainability ... 63

3.7 Procedures and plans to accomplish supportable decrease of
Non-technical losses ... 64
3.7.1 The Essentials Infrastructure ... 64
3.7.2 The innovative insurgency: mechanized meter perusing
   and progressed metering foundation ... 64
   (a) "Guard dog" Impact on Consumers ... 65
   (b) Enhancement of the organization's corporate
       administration and against defilement endeavors ... 65
   (c) Implementation of Prepaid Utilization ... 66
   (d) Elimination of Losses in Non-reasonable Regions ... 67
   (e) Demand side Administration to Boost Productivity
       in Power supply and utilization ... 68
4. DISTRIBUTION ENERGY LOSSES DETECTION AND MITIGATION METHODS

4.1 Introduction
4.1.1 Characterization of Losses
4.2 Losses in Electrical Power Systems
4.3 Technical Losses
4.3.1 Variable Losses
4.3.2 Fixed Losses
4.4 Non-Technical Losses
4.4.1 Network Equipment Issues
4.4.2 Theft and Misrepresentation
4.4.3 Measurement Blunders
4.4.4 Measurement Equipment Breakdown
4.4.5 Network Information Issues
4.4.6 Incorrect Area or Empowerment Status of Association Focuses
4.4.7 Incorrect data of Estimation Hardware
4.4.8 Energy data Processing Issues
4.4.9 Estimation of Unmetered Utilizations
4.4.10 Estimation of utilizations between Meter Readings and Computations
4.4.11 Estimation of Technical Losses
4.4.12 Estimation of Recognized Issues
4.4.13 Other Energy Information handling Issues
4.5 Mitigation of NTL
4.5.1 Main Principles
4.6 NTL mitigation using data mining ... 86
4.7 Mitigation of Theft and Fraud ... 86
4.8 Other measures of NTL Detection ... 87
   4.8.1 Equipment-related measures ... 87
   4.8.2 Utility process-related measures ... 88
   4.8.3 Law enforcement-related measures ... 88
4.9 Conclusion ... 89

5. DATA MINING AND REGRESSION MODELS ... 90
   5.1 Data Mining an Overview ... 90
   5.2 The Five Steps of the Data Mining Process ... 91
      5.2.1 Process ... 92
      5.2.2 Pre-processing ... 92
   5.3 Data mining involves six common classes of tasks ... 92
   5.4 Results validation ... 93
   5.5 Regression Analysis ... 94
   5.6 Types of regression ... 95
      5.6.1 Regression Lines and Linear Regression ... 95
      5.6.2 Assumptions Underlying Simple Liner Regression ... 95
   5.7 Regression Model ... 96
      5.7.1 Procedure ... 97
      5.7.2 Regression Coefficient ... 98
      5.7.3 Difference between Regression Analysis and Correlation Analysis ... 99
      5.7.4 Coefficient of Determination ... 100
      5.7.5 Computation of Coefficient of Determination ... 100
   5.8 Importance of Regression Analysis ... 100
5.9 Study Area and Data Collection ... 101
  5.9.1 Feeder Data ... 101
  5.9.2 Distribution Transformer Data ... 101
  5.9.3 High voltage Transmission Lines Data ... 101
  5.9.4 Low Voltage Lines Data ... 102
  5.9.5 Consumer Data ... 102

6. REGRESSION MODELLING - ESTIMATION OF NON-TECHNICAL LOSSES IN POWER DISTRIBUTION . 103
  6.1 Overview ... 103
  6.2 Introduction ... 104
  6.3 Proposed Method ... 105
  6.4 Results and Discussions ... 113
  6.5 Conclusion ... 126

7. CONCLUSIONS . 128
  7.1 Future Scope ... 128
