ACKNOWLEDGEMENT

I am deeply indebted to Prof. A. K. Srivastava, Department of Psychology, Faculty of Social Sciences, Banaras Hindu University, who guided me along the path of higher learning as my supervisor. Above all the most needed, he provided me the unflinching encouragement and support in various ways. No doubt his support, guidance, advises, supervision, and crucial contribution invaluably made him a backbone of this research and so to this thesis. It has been a great privilege and pleasure to work under his supervision.

I respectfully acknowledge the help accorded by Prof. R. Pandey, Head of the Department, BHU. He always gave generously of his time, his ideas and suggestions to guide this research study with his expertise in research methodology. I feel most fortunate to have had him as an advisor.

Thank you Department of Psychology, Banaras Hindu University, for providing me the lovely experience of being your part and giving me the opportunity to conduct this research. Additionally, I am fortunate to have been associated with other capable and supportive professors, staff and colleagues of the department.

I would like to thank all the organizations, and their employees - who participated in this study for giving their valuable time and providing me with a wealth of information.

I would also like to thank Dr Gaskin, Doctor of Management Program at the Weatherhead School of Management, Ohio who taught me Structural Equation Modelling through videos and mails.

I am also grateful to my cohort of research scholars, Rajani Rai, Vineeta Saini, Rashmi Srivastava, Shivani Singh, Divya Singh, Anshul Jaiswal for all of the love, friendship, and support we have shared over the last four years. I
these individuals my friends, and each of them has contributed something significant to my life. I know that these friendships will be a part of my life for many years to come.

Any achievement in life of a person is meaningless without the moral support provided by the friends of the past who always know about what we are capable of achieving. My heartily and soulful thanks goes to my friends from childhood onwards. The family members also have important contribution in bearing the upsets of my moods in my low time. Thanks to all.

Now comes, my lovely software siblings Sachin Gill and Shilpa Gill who has become my source of motivation in choosing the sample as well as contributed a great help in data collection. Special thanks to both of them.

My deep appreciation to my husband, Dr. Sat Kumar Tomer, for being such a wonderful partner! He has shown his consistent support and patience at every steps required in achieving goals to this endeavour.

I would also take the opportunity to thank my husband’s family for supporting me warmly throughout and being equally enthusiastic and wishful for my studies.

Last but not the least; I would like to thank my parents for their continuous support, encouragement, and undying faith in my ability to complete this endeavour.

I would also like to thank everyone who contributed in any possible way for the realization of my thesis, my sincere apology for not mentioning the name personally.

Yukti Gill
