LIST OF FIGURES

Figure 1.1 Research Methodology 6

Figure 3.1 Study Area (a) India (b) Tapi Basin (c) Lower Tapi Basin 48

Figure 3.2 Study Area for Morphometric Analysis 50

Figure 3.3 Location of Varekhadi a pilot sub-watershed in LTB superimposed over Landsat7ETM+ image in False Colour Composite (FCC) 52

Figure 4.1 Cartsat 1 (2.5m Resolution) Stereo PAN Scenes for Lower Tapi Basin 63

Figure 4.2 Landuse Map of Lower Tapi Basin 64

Figure 4.3 DEMs for Lower Tapi Basin: (a) SRTM-GL1 (b) GDEM-V2 (c) AW3D30 (d) CartoDEM-V3.1 67

Figure 4.4 Slope Maps of Lower Tapi Basin 69

Figure 4.5 Stream Network for Lower Tapi Basin 70
Figure 4.6: Drainage Network of Varekhadi 71

Figure 4.7 SOI Toposheet Level Points in Varekhadi Watershed 72

Figure 4.8 Contour Lines in Varekhadi Watershed 73

Figure 4.9: Digital Elevation Models for Varekhadi Watershed 75

Figure 4.10 Slope map of Varekhadi derived from different DEMs 77

Figure 5.1: DGPS Setup for GCPs collection 80

Figure 5.2: GCPs location in the study area 86

Figure 5.3 Base and Rover DGPS Station Locations for GCP collection in LTB 89

Figure 5.4: Photographs showing predominant landcover types in lower Tapi basin 90

Figure 5.5: GCP data processing collected from Sokkia GSX2 Receivers 92
Figure 6.1: Methodology for Vertical Accuracy Assessment of DEMs with reference to DGPS derived GCPs

Figure 6.2 Vertical Error Histogram for LTB (A) SRTM-GL1 (B) GDEM-V2 (C) AW3D30 (D) CARTODEM-V3.1

Figure 6.3 Vertical error histogram for Agriculture region (a) SRTM-GL1 (b) GDEM-V2 (c) AW3D30 (d) CartoDEM-V3.1

Figure 6.4 Vertical error histogram for Forest Area (a) SRTM-GL1 (b) GDEM-V2 (c) AW3D30 (d) CartoDEM-V3.1

Figure 6.5 Vertical error histogram for Builtup (a) SRTM-GL1 (b) GDEM-V2 (c) AW3D30 (d) CartoDEM-V3.1

Figure 6.6 Vertical error histogram for 500m buffer area near water bodies (a) SRTMGL1 (b) GDEM-V2 (c) AW3D30 (d) CartoDEM-V3.1

Figure 6.7 Vertical error histogram for low-lying coastal region (a) SRTM-GL1 (b) GDEM-V2 (c) AW3D30 (d) CartoDEM-V3.1

Figure 7.1 Drainage Network (with stream order) derived from (a) SOI Toposheet, (b) SRTM-GL1, (c) AW3D30, (d) GDEM-V2 and (e) CartoDEM-V3.1
Figure 7.2 Drainage network derived from SOI Toposheet and different DEMs  123

Figure 7.3 Relative Error in Basin Geometry Parameters in DEMs derived stream network with respect to SOI toposheet derived stream network  126

Figure 7.4 Relative error in stream order in DEMs derived stream network with respect to SOI toposheet derived stream network  127

Figure 7.5 Stream Number DEMs normalized with SOI Toposheet  130

Figure 7.6 Relative Error in Mean Length of Streams in DEMs derived stream network with respect to SOI toposheet derived stream network  131

Figure 7.7 Mean Length of Streams of DEMs normalized with SOI Toposheet  132

Figure 7.8 Aeral Morphometric Parameters of Streams of DEMs normalized with SOI Toposheet  135

Figure 7.9 Relief Morphometric Parameters of Streams of DEMs normalized with SOI Toposheet  139
LIST OF TABLES

Table 4.1 Details (resolution, datum (horizontal and vertical) of Elevation Dataset 56

Table 4.2 Details of Cartosat 2.5m Resolution Stereo PAN Data of P5 Satellite for Lower Tapi Basin from NRSC 61

Table 4.3 Percentage pixel distribution to different landcover in Lower Tapi Basin 65

Table 4.4 Slope Class Distribution for Lower Tapi Basin 70

Table 5.1 Specification for Dual Frequency GNSS Receivers 81

Table 5.2 GPS Rapid Static Field Observation Plan 87

Table 5.3 DGPS Base Data Information after Post-Processing 95

Table 6.1 Statistical analysis of discrepancies in vertical elevation in DEMs compared to GCPs for LTB, different landcover classes and coastal region 101

Table 7.1 Morphometric parameters with their mathematical expression 120
Table 7.2 Basic and linear morphometric parameters of Varekhadi Watershed

Table 7.3 Linear, Areal and Relief morphometric parameters of Varekhadi Watershed
