TABLE CONTENTS

Table 1: Effect of mutagenic treatments on germination in lentil.

Table 2: Effect of mutagenic treatments on seedling height in lentil.

Table 3: Effect of mutagenic treatments on germination, survival, growth, fertility and yield in lentil.

Table 4: Number of abnormal cells at different stages of mitosis in mutagen treated lentil.

Table 5: Percentage of abnormal cells at different stages of mitosis in mutagen treated lentil.

Table 6: Number of PMC's showing anomalies at different stages of meiosis in mutagen treated lentil.

Table 7: Percentage of PMC's showing anomalies at different stages of meiosis in mutagen treated lentil.

Table 8: Comparision of percentage of abnormal cells during mitosis and meiosis in mutagen treated lentil.

Table 9: Frequency and spectrum of mutations induced by separate and simultaneous application of gamma rays and EMS in lentil.

Table 10: Frequency of mutations induced by separate and simultaneous application of gamma rays and EMS in lentil.

Table 11: Comparision of mutation frequencies of chlorophyll, vital and sterile mutations induced by separate and simultaneous application of gamma rays and EMS in lentil.

Table 12: Mutagenic efficiency of different mutagenic treatments in lentil.
Table 13: General mean of various polygenic traits in M2 populations of mutagen treated lentil.

Table 14: Interfamily variance in M2 populations of mutagen treated lentil.

Table 15: Intrafamily variance in M2 populations of mutagen treated lentil.

Table 16: Interfamily coefficient of variability in M2 populations of mutagen treated lentil.

Table 17: Intrafamily coefficient of variability in M2 populations of mutagen treated lentil.

Table 18: Phenotypic coefficient of variability in M2 populations of mutagen treated lentil.

Table 19: Genotypic coefficient of variability in M2 populations of mutagen treated lentil.

Table 20: Environmental coefficient of variability in M2 populations of mutagen treated lentil.

Table 21: Main characters of 21 selected elite mutants

Table 22: Performance of twenty one elite mutants of lentil for yield and its components.

Table 23: Comparision of twenty one elite mutants of lentil on the basis of their performance for various traits.

Table 24: Variance and coefficient of variability at phenotypic, genotypic and environmental levels in the twenty one elite mutants of lentil.

Table 25: Heritability, Genetic advance and Net genetic gain for various traits in twenty one elite mutants of lentil.
Table 26: Phenotypic coefficients of correlation between various traits in twenty one elite mutants of lentil.

Table 27: Genotypic coefficients of correlation between various traits in twenty one elite mutants of lentil.

Table 28: Environmental coefficients of correlation between various traits in twenty one elite mutants of lentil.

Table 29: Phenotypic path coefficients for various traits in twenty one elite mutants of lentil.

Table 30: Genotypic path coefficients for various traits in twenty one elite mutants of lentil.

Table 31: Environmental path coefficient for various traits in twenty one elite mutants of lentil.

Table 32: Genetic divergence among control and twenty one elite mutants of lentil.

Table 33: Average intra and inter cluster distances among different clusters of lentil mutants.

Table 34: Cluster means for various clusters of lentil mutants.

Table 35: Index scores for yield and its components in M₃ generation of twenty one elite mutants and the control variety of lentil.

Table 36: Mean values with index scores in brackets for various polygenic traits in M₃ generation of twenty one elite mutants and the control variety of lentil.
