LIST OF FIGURES

Figure 1.1 The HPV genome and its expression within the epithelium
Figure 1.2 Gross appearance of cervical cancer on examination
Figure 1.3 Development of cervical cancer
Figure 1.4 Transformation zone of the uterine cervix
Figure 2.1 Structure of Human papillomavirus
Figure 2.2 Linear schematic diagram of papillomavirus genome
Figure 2.3 Uninfected (left) and HPV-infected (right) epithelia showing various differentiated layers and virion production
Figure 2.4 Cervical cancer; estimated incidence, mortality and prevalence worldwide in 2012
Figure 3.1 Workplan of the study
Figure 3.2 Step wise procedure for cytobrush sample collection
Figure 3.3 Stained PAP smear of cervical sample
Figure 3.4 Cervical tissue biopsy stained with H and E
Figure 4.1 Agewise distribution of study participants based on presence / absence of HPV DNA
Figure 4.2 Agarose gel of the product of Human papillomavirus (HPV types 6, 11, 16, 18, 31 and 33) common gene amplified by conventional PCR
Figure 4.3 Chromatogram obtained after sequencing of the HPV 16 positive cytobrush sample
Figure 4.4 NCBI BLAST result for sequencing of HPV 16 gene
