### CHAPTER-1  PYRIDAZINE: A PRIVILEGED MOTIF OF BIOLOGICAL SIGNIFICANCE

1.1 Pyridazines as Anticancer Agents 2-7  
1.2 Pyridazines as Anti-inflammatory Agents 8-11  
1.3 Pyridazines as Antimicrobial Agents 12-16  
1.4 Pyridazines as Antitubercular Agents 17-18  
1.5 Pyridazines as Enzyme Inhibitors 19-24  
1.6 REFERENCES 25-28  

### CHAPTER-2  3,6-DICHLOROPYRIDAZINE: A VERSATILE SYNTHON FOR THE SYNTHESIS OF SOME 6-CHLORO-1,2,4-TRIAZOLO[4,3-b] PYRIDAZINES AND THEIR DERIVATIVES OF BIOLOGICAL INTEREST

2.1 BIOLOGICAL IMPORTANCE OF 1,2,4-TRIAZOLES: A BRIEF REVIEW 29-52  
2.1.1 1,2,4-Triazoles as Antimicrobial Agents 31-34  
2.1.2 1,2,4-Triazoles as Anticancer Agents 35-42  
2.1.3 1,2,4-Triazoles as Anticonvulsant Agents 43-45  
2.1.4 1,2,4-Triazoles as Antitubercular Agents 46-48  
2.1.5 1,2,4-Triazoles as Enzyme Inhibitors 49-52  
2.2 OBJECTIVE OF THE WORK 53
2.3 RESULTS AND DISCUSSION

2.3.1 Hypervalent Iodine Mediated Synthesis of 6-Chloro-3-alkyl/aryl/heteroaryl-1,2,4-triazolo[4,3-b]pyridazines by Oxidative Cyclization of 6-Chloro-3-alkylidene/arylidene/heteroarylidenehydrazinopyridazines 54-74

2.3.2 Hypervalent Iodine Mediated Synthesis of 3,6-Di-(aryl/heteroaryl)-bis-1,2,4-triazolo[4,3-b][3',4'-f]pyridazines by Oxidative Cyclization of 6-Arylidene/heteroarylidenehydrazino-3-(aryl/heteroaryl)-1,2,4-triazolo-[4,3-b]pyridazines 75-95

2.3.3 Multi-component Solvent-free Synthesis of 3,6-Di-(aryl/heteroaryl)-bis-1,2,4-triazolo-[4,3-b][3’,4’-f]pyridazines 95-98
2.3.4 Aliquat 336 Catalysed Synthesis of 6-(3,5-Dimethyl-1H-pyrazol-1-yl)-3-aryl/heteroaryl-1,2,4-triazolo[4,3-b]pyridazines

2.3.5 Aliquat 336 Catalysed Regioselective Synthesis of 6-(5-Methyl-3-phenyl-1H-pyrazol-1-yl)-3-aryl-1,2,4-triazolo[4,3-b]pyridazines

2.4 EXPERIMENTAL

CHAPTER-3 3,6-DICHLOROPYRIDAZINE: A VERSATILE SYNTON FOR THE SYNTHESIS OF 5-AMINOPYRAZOLES AND THEIR DERIVATIVES

3.1 BIOLOGICAL SIGNIFICANCE OF 5-AMINOPYRAZOLES: A BRIEF REVIEW

3.1.1 5-Aminopyrazoles as Antimicrobial Agents
3.1.2 5-Aminopyrazoles as Anti-inflammatory Agents 167-169
3.1.3 5-Aminopyrazoles as Anticancer Agents 169-170
3.1.4 5-Aminoopyrazole as Antimalarial Agents 170-171
3.1.5 5-Aminopyrazoles as Antiprotozoal Agents 171-172
3.1.6 5-Aminopyrazoles as Anti-HIV Agents 173

3.2 OBJECTIVE OF THE WORK 174
3.3 RESULTS AND DISCUSSION 175-205
3.3.1 Synthesis of 1-(6-Chloropyridazin-3-yl)-3-substituted-4-phenyl-1H-pyrazol-5-amines: Reaction of 6-Chloro-3-hydrazinopyridazine with Substituted β-Ketonitriles 175-187

3.3.2 Synthesis of 1-(6-(Cyclicam-1-yl)pyridazin-3-yl)-3-substituted-4-phenyl-1H-pyrazol-5-amines by Amino-de-halogenation of 1-(6-Chloropyridazin-3-yl)-3-substituted-4-phenyl-1H-pyrazol-5-amines via Secondary Amines 188-198
3.3.3 Synthesis of 1-(6-Chloropyridazin-3-yl)-3-substituted-4-H/phenyl-1H-pyrazol-5-yl)diazenylnaphthalen-1-ol) by Diazotization of 1-(6-Chloropyridazin-3-yl)-3-substituted-4-H/phenyl -1H-pyrazol-5-amines

3.4 EXPERIMENTAL
