ACKNOWLEDGEMENT

I take this opportunity to owe my immense debt of gratitude to my guide Dr.(Mrs.) Kusum Aggarwal, Reader in Home Science, Guru Nanak Girls P.G. College, Kanpur not only for her interest coupled with constant supervision, guidance, encouragement and support rendered to me in conducting research work, but also for suggesting this problem and for devoting her precious time to me for my research work. It would have been extremely difficult to complete the work without her guidance and appropriate suggestions.

It is honour and privilege to express my gratitude and indebtedness to Head of the Department of Home Science, G.N.G.P.G. College, Kanpur for providing me necessary facilities. I am also thankful to all the faculty members of the college for their valuable suggestions and encouragement.

My heartful emotions from my core of heart are due to my beloved parents for their affection, love and moral support throughout my study period. Without their valuable support, encouragement, pleasing and best wishes, this difficult task was impossible to be completed during the stipulated time.
