ACKNOWLEDGEMENT

I express my esteemed sense of gratitude to Dr. Nitya Anand, FNA, Director, Central Drug Research Institute, Lucknow, for his valuable guidance and constant encouragement during the accomplishment of the present work.

I am highly indebted to Dr. Satyavan Sharma, Scientist, Medicinal Chemistry Division for his sustained interest, helpful discussions, stimulating criticisms and for introducing to the fascinating realms of scientific investigations, which enabled me to bring my research efforts to fruition.

I am very much thankful to Dr. R.N. Iyer, Ex-Assistant Director, Medicinal Chemistry Division, for the help in extending my research career, fruitful discussions and encouragement.

I express my grateful thanks to Dr. S.P. Popli, Deputy Director and Head, Medicinal Chemistry Division, for the inspiration and encouragement, I received, in research work and also for providing the necessary laboratory facilities.

My sincere thanks are to Drs. A.B. Sen, O.P. Srivastava, J.C. Katiyar and R.K. Chatterjee for making available the necessary biological results. I am also
thankful to all the scientists in Medicinal Chemistry Division for their casual help extended to me generously.

The cheerful company of Dr. Syed Abuzar will be in my deep memory. I wish to thank him for his untiring help rendered during the preparation of the manuscript of this thesis. I also acknowledge the stimulating companionship and valuable co-operation of Dr. K.V.B. Rao and other colleagues of the Division.

I am thankful to the staff of the Regional Sophisticated Instrumentation Centre, C.D.R.I., Lucknow, for providing the spectral and analytical data and also to the technical staff of Glass Blowing Section. Thanks are also due to Indian Council of Medical Research, New Delhi, for providing the financial assistance for the present research work.
