LIST OF FIGURES

Figure 1.1: Node communication in MANET .............................................................. 2
Figure 2.1: Overview of Mobile Adhoc Network ...................................................... 20
Figure 3.1: Block diagram of Sensor Node ............................................................... 40
Figure 3.2: Radio Model ......................................................................................... 41
Figure 3.3 Classification of routing protocols in wireless sensor networks
{Modirkhazeni, 2010 #364} ..................................................................................... 45
Figure 4.1: Normal Route Discovery from Source Node A to Destination Node F ........ 64
Figure 4.2: Route Request Packet Format. Reprinted from RFC 3561 ..................... 65
Figure 4.3: Route Reply Packet Format. Reprinted from RFC 3561 ..................... 66
Figure 4.4: Route Error Packet Format. Reprinted from RFC 3561 ..................... 66
Figure 4.5: Exchange of Hello Packets between Neighbours with Time To Live (TTL) 1
................................................................................................................................. 70
Figure 4.6: Comparison of Throughput between AODV and TSPM for 50, 100 and 150
Nodes with pause time ......................................................................................... 76
Figure 4.7: Comparison of Throughput between AODV and TSPM for 50, 100 and 150
Nodes with varying Node Speed ........................................................................ 77
Figure 4.8: Comparison of Throughput between AODV and TSPM with 1-5 Source
Nodes as Attacker with 50 Nodes ....................................................................... 78
Figure 4.9: Comparison of Throughput between AODV and TSPM with 1-5 Source
Nodes as Attacker with 100 Nodes ..................................................................... 79
Figure 4.10: Comparison of Throughput between AODV and TSPM with 1-5 Source
Nodes as Attacker with 150 Nodes ..................................................................... 80
Figure 4.11: Comparison of Average End to End Delay between AODV and TSPM for
50, 100 and 150 Nodes with pause time ............................................................... 82
Figure 4.12: Comparison of Average End to End Delay between AODV and TSPM for
50, 100 and 150 Nodes with varying Node Speed ............................................... 83
Figure 4.13: Comparison of Average End to End Delay between AODV and TSPM
with 1-5 Source Nodes as Attacker with 50 Nodes .............................................. 85
Figure 4.14: Comparison of Average End to End Delay between AODV and TSPM
with 1-5 Source Nodes as Attacker with 100 Nodes ......................................... 86
Figure 4.15: Comparison of Average End to End Delay between AODV and TSPM
with 1-5 Source Nodes as Attacker with 150 Nodes ........................................... 86
Figure 4.16: Comparison of PDR between AODV and TSPM for 50, 100 and 150
Nodes with pause time ....................................................................................... 88
Figure 4.17: Comparison of PDR between AODV and TSPM for 50, 100 and 150
Nodes with varying Node Speed ....................................................................... 89
Figure 4.18: Comparison of PDR between AODV and TSPM with 1-5 Source Nodes as
Attacker with 50 Nodes ...................................................................................... 90
Figure 4.19: Comparison of PDR between AODV and TSPM with 1-5 Source Nodes as
Attacker with 100 Nodes .................................................................................... 91
Figure 4.20: Comparison of PDR between AODV and TSPM with 1-5 Source Nodes as Attacker with 150 Nodes ................................................................. 92
Figure 5.1: Normal data flow in WSN with three clusters and a base station .......... 96
Figure 5.2: WSN Without Blackhole Attack ...................................................... 101
Figure 5.3: WSN under Blackhole Attack .......................................................... 102
Figure 5.4: Comparison of Remaining Energy between LEACH and SEET under Blackhole Attack ........................................................................ 109
Figure 5.5: Cluster wise Remaining Energy of LEACH Under Blackhole Attack ..... 111
Figure 5.6: Cluster wise Remaining Energy Under Blackhole Attack ............... 112
Figure 5.7: Comparison of Network Lifetime between LEACH and SEET under Blackhole Attack ........................................................................ 113
Figure 5.8: Network life time under Blackhole ............................................... 114
Figure 5.9: Network life time under SEET ....................................................... 115
Figure 5.10: Throughput of WSN ................................................................. 116
Figure 5.11: Cluster wise Throughput of LEACH under Blackhole .............. 117
Figure 5.12: Cluster wise Throughput of SEET Under Blackhole .................. 118
Figure 5.13: Effect on remaining energy with change in number of blackhole clusterheads ................................................................. 120
Figure 5.14: Effect on throughput with change in number of blackhole clusterheads . 120
