# Table of Contents

## Table of Contents

**SYNOPSIS**

**LIST OF FIGURES**

**LIST OF TABLES**

**CHAPTER-1 INTRODUCTION**

1.1. Synchrotron radiation source

1.2. Electronic states: Rydberg and valence

1.3. Molecular symmetry

1.4. Computation of molecular electronic structure

1.5. Construction of molecular orbital energy level diagram

1.5.1. Sulphur dioxide (SO₂)

1.5.2. Chloroform (CHCl₃)

1.5.3. Acetone [(CH₃)₂CO]

1.6. Plan of the thesis

**CHAPTER-2 EXPERIMENTAL**

2.1 Design and development of HRUV beamline

2.1.1 Beam line description

2.1.1.1 Optical layout

2.1.1.2 6.65 m spectrometer

2.1.1.3 Experimental setup

2.1.2 Optical alignment

2.1.2.1 Beamline

2.1.2.2 Spectrometer

2.1.3 Performance testing

2.1.3.1 Resolution and reproducibility

2.1.3.2 Absorption spectrum of O₂

2.1.3.3 Absorption spectrum of SO₂

2.1.4 Comparison with beamlines around the world

2.2. Photophysics beamline

2.3. Development of matrix isolation spectroscopy setup

2.3.1 MIS setup

2.3.1.1 Liquid helium cryostat

2.3.1.2 Experimental and mixing chambers

2.3.2 Testing of components

2.3.3 Off-line experiments on oxygen ice

2.3.4 VUV spectrum of CO in argon matrix

**CHAPTER-3 VIBRONGIC ANALYSIS OF \( \tilde{E} - \tilde{X} \) SYSTEM OF SO₂**

3.1 Introduction

3.2 Experimental
# Table of Contents

3.3 Results and discussion 57
   3.3.1 Experimental observations 57
   3.3.2 Computational results 60
   3.3.3 Ground state geometry and vibrational frequencies 62
   3.3.4 Excited state energies, geometry optimization and vibrational frequencies 64
   3.3.5 Potential energy curves 69

3.4 Correlation of experimental data with theoretical results 72

3.5 Summary 74

CHAPTER-4 VUV PHOTOABSORPTION STUDY OF ACETONE 75-106

4.1 Introduction 75

4.2 Experimental 79

4.3 Results and discussion 79
   4.3.1 Valence excited states 83
   4.3.2 Rydberg series 84
      4.3.2.1 Assignment of \( ns \) Rydberg series and accompanying vibronic structure 86
      4.3.2.2 Assignments of \( np \) Rydberg series and accompanying vibronic structure 91
      4.3.2.3 Assignments of \( nd \) Rydberg series and accompanying vibronic structure 98

4.4 Summary 105

CHAPTER-5 RYDBERG AND VIBRONIC STATES OF ACETONE 107-124

5.1 Introduction 107

5.2 Experimental 109

5.3 Computational 109

5.4 Results and discussions 111
   5.4.1 Rydberg series 111
   5.4.2 Vibronic analysis of the \( 1a_2 \rightarrow 4p \) Rydberg Transition 120

5.5 Summary 123

CHAPTER-6 MATRIX ISOLATION SPECTROSCOPY OF ACETONE AND SULPHUR DIOXIDE 125-140

6.1 Introduction 125

6.2 VUV Spectroscopy of Matrix Isolated Molecules: General 127

6.3 Experimental details and results 128
   6.3.1 VUV photoabsorption of \( SO_2 \) 128
   6.3.2 VUV spectrum of acetone-\( h_0 \) and acetone-\( d_0 \) isolated in argon matrix 134

6.4 Summary 139

CHAPTER-7 CONCLUSION AND FUTURE DIRECTION 141-145

7.1 Conclusions 141

7.2 Future directions 144

References 146-156
