SYNOPSIS xi
LIST OF FIGURES xxix
LIST OF TABLES xxxv

1. Introduction

1.1 Preface 1
1.2 Experimental methods for high pressure generation 8
  1.2.1 Static Compression Techniques 8
    1.2.1.1 Method of Generation of Static High Pressure 8
    1.2.1.2 Diagnostic Techniques in Static High Pressure Experiments 10
  1.2.2 Shock Compression Techniques 14
    1.2.2.1 Basic Concepts of Shock Compression 14
    1.2.2.2 Techniques of Shock Wave Loading 18
    1.2.2.3 Diagnostic Techniques in Shock Wave Experiments 20
1.3 Computational methods for high-pressure research 21
1.4 Density Functional Theory 26
  1.4.1 Born-Oppenheimer (BO) Approximation 28
  1.4.2 Kohn-Sham Ansatz 30
  1.4.3 Local Density Approximation 32
  1.4.4 Generalized Gradient Approximation 34
  1.4.5 Semi-local functional 35
  1.4.6 Orbital-dependent functional 35
3. High Pressure Phase Transition in Transition Metal Carbides ScC, YC and TaC

3.1 Introduction 89

3.2 Methodology Employed for Present Calculations 91

3.2.1 Calculation details for structural and lattice dynamic stability analysis 91

3.2.2 Details of structures used for analysis 92

3.3 Results and Discussions 94

3.3.1 Structural stability and equation of state of ScC and YC 94

3.3.2 Elastic stability and dynamical stability of ScC and YC under pressure 100

3.3.3 Structural stability and equation of state of TaC 107

3.3.4 Elastic stability and dynamical stability of TaC under pressure 109

3.3.5 Effect of temperature on Thermo physical properties of TaC 114

3.4 Summary 117

4. Structural Stability Analysis of CeN under High Pressure

4.1 Introduction 120

4.2 Methodology Employed for Present Calculations 122

4.2.1 Structural stability analysis and determination of equation of state 123

4.3 Results and Discussions 124

4.3.1 Structural Phase Transition Sequence and the EOS 124
4.3.2 Elastic and dynamic stability under pressure. 128
4.3.3 Reproduction of phase transition in LaN 134
4.4 Summary 135

5. Structural Stability Analysis of ThC and UC under High Pressure
5.1 Introduction 138
5.2 Methodology Employed for Present Calculations 141
   5.2.1 Thorium carbide 141
   5.2.2 Uranium carbide 144
5.3 Results and Discussions 145
   5.3.1 Structural stability, equation of state and electronic density of states of ThC 145
   5.3.2 Elastic stability and dynamical stability of ThC 153
   5.3.3 Zero pressure thermophysical properties of ThC at high temperature 158
   5.3.4 Structural stability and equation of state of UC 163
   5.3.5 Elastic stability and Dynamical stability of UC in B1 phase 171
5.4 Summary 174

6. Summary and Future Scope 179
