**CONTENTS**

Acknowledgement ........................................ 8  
List of Figures and Tables .............................. 10  
List of abbreviations .................................... 12  
Summary ..................................................... 14  

**CHAPTER-1: General Introduction**

1.1. Introduction ........................................ 21  
1.2. Objectives ......................................... 27  
1.3. Significance of the study ....................... 27  

**CHAPTER-2: Review of Literature**

2.1 Complement Pathways and inflammatory diseases .................................................. 29  
   2.1.1 Different complement pathways and their regulation .................................. 30  
   2.1.2 Complement pathways in pathogenesis of diseases ....................................... 37  
2.2 Complement Factor H and its related proteins ......................................................... 38  
   2.2.1 Complement factor H related proteins ......................................................... 42  
   2.2.2 Competition between FH/FHRs for cell surface recognition .......................... 49  
   2.2.3 Role of FHRs in infection ................................................................. 51  
2.3 Genomic variations in complement factor H related proteins and their association to diseases .................................................. 52  
   2.3.1 FH::FHR1 hybrid gene formation ............................................................ 54  
   2.3.2 FH::FHR3 hybrid gene formation ............................................................ 54  
   2.3.3 FHR3-FHR1 hybrid gene formation and FHR1 gene duplication .................. 55  
   2.3.4 FHR5 gene duplication ................................................................. 55  
   2.2.5 FHR1/3 homozygous deletion ............................................................ 56  
2.4 Healthy population carry FHR1/3 homozygous deletion ........................................ 57
2.5 Factor H in regulation of cellular functions

CHAPTER-3: To assess the proportion of different immune cell types in FHR1/3+/+ and FHR1/3 -/- individuals

3.1 Introduction
3.2 Material and methods
   3.2.1 Antibodies and reagents
   3.2.2 Sample collection and isolation of PBMCs
   3.2.3 Genotyping
   3.2.4 Immunophenotyping
3.3 Results
   3.3.1 Assessment of innate immune compartment
   3.3.2 Assessment of adaptive immune compartment
3.4 Discussion
3.5 Conclusion

CHAPTER-4: To assess the level of FH on different immune cell types in FHR1/3+/+ and FHR1/3-/- individuals

4.1 Introduction
4.2 Material and Methods
   4.2.1 Antibodies and reagents
   4.2.2 Analysis of surface level of FH and C3b on various subsets of immune cell
   4.2.3 Sample collection and separation of plasma
   4.2.4 Quantification of FH levels in plasma
4.3 Results
   4.3.1 Differences in surface level of FH on immune cells
4.3.2 Differences in surface level of C3b on immune cells

4.4 Discussion

4.5 Conclusion

CHAPTER-5: To dissect the functional relevance of above differences in immune cell types between \textit{FHR1/3\textasciitilde/+} and \textit{FHR1/3\textasciitilde/-} individuals

5.1 Introduction

5.2 Material and methods

5.2.1 Antibodies and reagents

5.2.2 Cytokine secretion assay in monocyte

5.2.3 Phagocytosis assay in monocyte

5.2.4 Transmigration assay in monocyte

5.2.5 Cytokine secretion assay in dendritic cell

5.2.6 Cytokine secretion analysis in T cell

5.2.7 Generation of \textit{FH} deleted monocytic cell and their functional assessment

5.3 Results

5.3.1 Analysis of monocyte function in \textit{FHR1/3\textasciitilde/-} individuals

5.3.2 Analysis of dendritic cell function in \textit{FHR1/3\textasciitilde/-} individuals

5.3.3 T-helper and regulatory response

5.3.4 \textit{FH} deleted (\textit{FH\textasciitilde/-}) monocytic cell response \textit{in vitro}

5.3.5 Monocyte response of \textit{FHR1/3\textasciitilde/-} individuals in presence of exogenous FH \textit{Ex vivo}

5.4 Discussion

5.5 Conclusion

Chapter-VI: Conclusion and Remarks
