ACKNOWLEDGEMENTS

The pursuit of this thesis has taught me many valuable things: that everything is possible if you are determined and believe in what you are doing, and, that some periods on the timeline of a person’s life can be so crowded and complicated that you think you will never complete them, but eventually you will.

First, I would like to thank my Respected Sir, Dr. P. K. Shah, Principal, Silver Oak College of Engineering and Technology, Ahmedabad. He has inspired and encouraged me from the inception of preliminary work on solar energy. He has guided and supported during the development of this work for analysis, experimentation and thesis preparation. Under his visionary guidance, I was able to write the research papers for the International and National Conferences. Due to his continuous inspiration I was also able to deliver the topic speech as Invited Speaker in two International Conferences organized by SESI and MNRE, New Delhi.

I express my sincere thanks to Director of Technical Education, Gujarat state, Gandhinagar for permitting me to carry out this work as an external student to Gujarat University, Ahmedabad.

This research work might not be completed without the constant and encouraging blessed support from our visionary Principal, Dr. M. N. Patel, L. D. College of Engineering. It is my great pleasure to be heartily thankful for ever to him.

My sincere thanks to Prof. P. D. Solanki, Head of Mechanical Engineering Department, L. D. College of Engineering for his hearty co-operation in all respect to me to carry out this work. I am thankful to Prof. P. B. Patel for helping me constantly in this work. Above all I express my gratitude and thanks to Prof. S. M. Bhatt to inspire me initially to carry out the research work. I would also like to acknowledge the contribution of Mr. P. B. Shah, R. C. Technical Institute, Ahmedabad for instrumentations developments. I am thankful to my colleague Professors who have helped me by giving their valuable suggestions.

I am thankful to Professor in–charge of workshop and other staff of workshop in general and instructor Mr. V. K. Parmar and Mr. M. D. Patel in particular, for helping
me during fabrication and experimental activities. I thank the laboratory staff members and hamals for their constant help in fabrication and experimental works.

I thank the Librarians and other library staff at Library, L. D. College of Engineering, Ahmedabad, Library, IIT Mumbai and Library, SVNIT Surat for providing literature for my research work.

Finally, I am deeply indebted to my family for their encouragement and help. My special thanks to my wife Mrs. Beena, who many times played my role for the fulfillment for our family needs and social responsibilities.

Lastly, thanks to all of them for being close to me when I needed it the most.

December, 2011
J. M. Patel
Ahmedabad
