LIST OF FIGURES

Figure 2.2.1(a) Block diagram of JPEG compression.......................................................... 12
Figure 2.2.1(b) Block preparation .................................................................................. 12
Figure 2.2.1(d) DCT applied to image block .................................................................. 13
Figure 2.2.1(e) Standard JPEG quantization matrix....................................................... 13
Figure 2.2.1(f) Quantized matrix ................................................................................... 14
Figure 2.2.1(g) Zig-zag scanning pattern ....................................................................... 14
Figure 4.1.1(a) Overall embedding procedure flowchart .......................................... 29
Figure 4.1.1(b) Cohort Intelligence with Cognitive Computing (CICC) Flowchart (Approach 1) ... 33
Figure 4.1.1(c) Illustration a grey scale image using CICC ........................................ 35
Figure 4.1.1(d) Modified Multi Random Start Local Search (M-MRSL) Flow Chart (Approach 2) ..... 37
Figure 4.1.1(e) Illustration a grey scale image using M-MRLS ..................................... 39
Figure 4.1.1(f) Embedding Procedure of CICC/M-MRSL .......................................... 40
Figure 4.1.2 Extraction Procedure ............................................................................. 40
Figure 4.2(a) Six cover images with size 256 × 256 ...................................................... 42
Figure 4.2(b) Original and Stego-images of the CICC method ................................... 46
Figure 4.2(c) Original and Stego-images of the M-MRSL method ............................. 47
Figure 4.2(d): CICC Simulations (40 number of learning attempts) ......................... 50
Figure 4.2(e): M-MRSL Simulations (40 iterations) .................................................. 50
Figure 5.2.1(a): Block Diagram of embedding procedure ........................................... 57
Figure 5.2.1(b): Cohort Intelligence with Cognitive Computing (CICC) Flowchart (Approach 3) .... 62
Figure 5.2.1(c) Illustration of a grey scale image using CICC .................................... 64
Figure 5.2.1(d) Modified Multi Random Start Local Search (M-MRSL) Flow Chart (Approach 3) ..... 66
Figure 5.2.1(e) Illustration a grey scale image using M-MRSL .................................... 67
Figure 5.2.1(f) Embedding Procedure of CICC/M-MRSL (Approach-3) ................. 68
Figure 5.2.1(g) Generation of Stego Image ................................................................. 69
Figure 5.2.2 Extraction Procedure ............................................................................. 69
Figure 5.3(a) Original and Stego-images of the CICC and M-MRSL method ............... 72
Figure 5.3(b): CICC (Total-20 runs) (Approach 3) ...................................................... 79
Figure 5.3(c): M-MRSL (Total-20 runs) (Approach 3) .............................................. 82
Figure 6.1(a): Improved CI Algorithm (Approach 4) ................................................... 84
Figure 6.2.1(a): Embedding procedure (8×8 Quantization Table) .............................. 87
Figure 6.3.1(a): Embedding procedure (16×16 Quantization Table) (Approach 4) .... 94
Figure 6.4: Extraction procedure .............................................................................. 95
Figure 6.5(a) Original and Stego-images of the Improved CI method (8×8 Quantization Table) .... 102
Figure 6.5(b): Improved CI Simulations-20 runs (8×8 Quantization Table) ............. 103
Figure 6.5(c): Improved CI Simulations-20 runs (16×16 Quantization Table) .......... 104
