

ACKNOWLEDGEMENT

“Creative science is the ultimate gift provided by the nature”

Nature has its own laws that can not be changed but one can change oneself according to the natural facts. To observe nature and its laws, one needs proper knowledge, open mind, skillful eyes and right supervision. This was my whole observation during my Ph.D. work.

At very first, I express my warm gratitude and best regards to my supervisor Dr. Poonam Silotia of University of Delhi for all fruitful discussions and stimulating encouragement throughout the period of my thesis work. I am very grateful to her for giving me all the time and attention for completing the experimental work and writing this thesis.

I wish to express my deepest and sincere gratitude to my research co-supervisor Dr. A. M. Biradar of National Physical Laboratory (NPL), who apart from initiating me into research field, provided a regular guidance in carrying out the experimental and analysis work during my Ph.D. His knowledge and enthusiasm in science always inspired me and had been a strong motivation for me to exploit new knowledge. He was always available to solve my personal problems also.

I would like to specially thank to Head, Department of Physics and Astrophysics, Prof. R. P. Tondon and the members of advisory committee Prof. A. G. Vedeshwar and Dr. Shyama Rath, for their encouragement and timely support throughout the period of my research work. I thank all the staff of the University of Delhi for their support.

I am very thankful to Director NPL, Prof. R. C. Budhani, for giving me an opportunity to work in this laboratory. I thank all the staff members of NPL for their support.

I express my heartiest thanks to the list of personalities who in some way or the other have supported me all these years of my research work. I am grateful to Prof. K. K. Raina, Dr. D. S. Mehta, Dr. S. K. Dhawan, Dr. K. K. Saini, Dr. A. Dhar, Dr. S. P. Singh and many more for guiding me throughout.

I wish my heartiest thanks to my seniors and colleagues Dr. A. K. Thakur, Dr. S. Kaur, Dr. A. Choudhary, Dr. J. Prakash, Dr. G. Singh, Dr. A. kumar, Dr. I. Coondoo, Dr. P. Goel, Dr. P. Ganguly, Mr. S. K. Mishra, Mr. Achu Chandran and Mr. S. Tripathi for their continuous support and fruitful discussions. My special thanks to my colleague Mr. Tilak Joshi for his support and valuable suggestions to understand and analyze the new results. I also thank them to support me during my personal problems also.

I am fortunate enough to have many good friends who support me in every aspect throughout my Ph.D. career. I am especially grateful to Ms. Parul, Ms. Anu Rana, Ms. Yogita, Ms. Geetanjali, Dr. Ravi Shukla, Mr. Manoj Kumar Srivastava, Dr. Neeraj, Ms. Monika and Ms. Urvashi for their continuous moral support and encouragement

Apart from all those mentioned above, I would like to thank the utility services of NPL for doing their work efficiently and my special thank to Mr.(late) Anand Singh, Mr. Mangeram and Mrs. Shanti Devi for his all help he extended during my research work in the laboratory.

From the core of my heart, I am thankful to my parents and my in-laws, who equally encouraged me to pursue Ph.D. and support me at every moment during this period. My heartiest thank goes to my brother (Amit), my bhabhi (Anshu) and my didi (Dr. Shipra Singh) for their unconditional support and special thanks to the kids of my family Disha, Sanika and Aarav, to make me laugh whenever I feel depressed. My family becomes my strength at every major step during this period.

The most important person, who was the pillar of my strength during the entire period of my Ph.D., is my husband, Mr. Shakti. I know that his support can not define in words, it will be like a drop in the ocean but still my heartfelt and sincere thank to him, without his support, encouragement and love, this work would not have been achievable.

I especially acknowledge the Council of Scientific and Industrial Research (CSIR), New Delhi, India, for providing me financial assistance in the form of junior and senior research fellowship to carry out my Ph.D. work.

Ph.D. is not the job of a single person. It is the work of all who supported you and tolerated you throughout this difficult period. I once again would like to thank all of you who have supported me directly or indirectly during my Ph.D. work.
