

## LIST OF TABLES

<b>Table No.</b>	<b>Table Caption</b>	<b>Page No.</b>
<b>1.1</b>	Some important LCs with their molecular structures and phase transitions.	22
<b>1.2</b>	Structural classification of smectic mesophases.	28
<b>6.1</b>	Variation of dielectric strength ( $\Delta\epsilon$ ), distribution parameter ( $\alpha$ ) and relaxation frequency ( $\nu_{R,\epsilon''}$ ), with temperature for pure ELC material and comparison with theoretically calculated data.	186
<b>6.2</b>	Variation of dielectric strength ( $\Delta\epsilon$ ), distribution parameter ( $\alpha$ ) and relaxation frequency ( $\nu_{R,\epsilon''}$ ), with temperature for ZnO NPs doped ELC material and comparison with theoretically calculated data.	187

## LIST OF PUBLICATIONS

1. Memory effect near transition temperature in Sm C\* phase in non surface stabilized ferroelectric liquid crystals  
I. Coondoo, A. Malik, A. Choudhary, A. Kumar, and A. M. Biradar  
**J. Appl. Phys.**, **104**, 083525 (2008).
2. Enhanced memory effect in conducting polymer coated surfaces of ferroelectric liquid crystals  
A. Malik, J. Prakash, P. Silotia, and A. M. Biradar  
**Appl. Phys. Exp.**, **2**, 121401 (2009).
3. Effect of graphene oxide nanomaterial in electroclinic liquid crystals  
A. Malik, A. Choudhary, P. Silotia, A. M. Biradar, V. K. Singh, and N. Kumar  
**J. Appl. Phys.**, **108**, 124110 (2010).
4. Field-induced transition from homeotropic to planar geometry in the Sm C\* phase of an electroclinic liquid crystal  
A. Malik, I. Coondoo, A. Choudhary, and A. M. Biradar  
**Philosophical magazine**, **90**, 2733 (2010).
5. Effect of ZnO nanoparticles on the Sm C\*-Sm A\* phase transition temperature in electroclinic liquid crystals  
A. Malik, A. Choudhary, P. Silotia, and A. M. Biradar  
**J. Appl. Phys.**, **110**, 064111 (2011).
6. Anomalous low frequency dielectric relaxation in nanoparticles/isotropic fluid mixed ferroelectric liquid crystals  
A. Malik, G. Singh, J. Prakash, P. Ganguly, P. Silotia, and A. M. Biradar  
**Ferroelectrics**, **431**, 6 (2012).

7. Copper oxide decorated multi-walled carbon nanotubes/ferroelectric liquid crystal composites for faster display devices

**A. Malik**, J. Prakash, A. Kumar, A. Dhar, and A. M. Biradar

**J. Appl. Phys.**, **112**, 054309 (2012).

## **LIST OF RESEARCH PAPERS PRESENTED IN NATIONAL AND INTERNATIONAL CONFERENCES**

- [1] “Memory Effect in Ethanol Doped de Vries Electroclinic Liquid Crystal Materials”  
**A. Malik**, I. Coondoo, and A. M. Biradar, **15<sup>th</sup> National Conference on Liquid Crystals**, IISc, Bangalore, Oct. 13-15, (2008).
- [2] “Conducting polymer finds an application in the realization of ferroelectric liquid crystal based memory devices”  
**A. Malik**, J. Prakash, A. Choudhary, and A. M. Biradar, **16<sup>th</sup> National Conference on Liquid Crystals**, University of Lucknow, Lucknow, India, Oct. 26-28, (2009).
- [3] “Temperature dependent dielectric studies of graphene oxide nano material doped electroclinic liquid crystals”  
**A. Malik**, A. Choudhary, and A. M. Biradar, **17<sup>th</sup> National Conference on Liquid Crystals**, Deptt. of chemistry, VNSG Univ. Surat, Gujarat, Nov. 15-17, (2010).
- [4] “Anomalous low frequency dielectric relaxation in nanoparticles/isotropic fluid mixed ferroelectric liquid crystals”  
**A. Malik**, G. Singh, J. Prakash, P. Silotia, and A. M. Biradar, **13<sup>th</sup> International Conference on Ferroelectric Liquid Crystals**, Niagara Falls, Canada, 29 Aug.–2 Sep., (2011).
- [5] “Dielectric relaxations in nanomaterials/isotropic liquid mixed ferroelectric liquid crystals”  
**A. Malik**, J. Prakash, P. Ganguly, and A. M. Biradar, **Soft Matter Chemistry Workshop**, Raman Research institute, Bangalore, Nov. 9-11, (2011).

- [6] “Dielectric and electrooptical properties of copper oxide decorated carbon nanotubes doped ferroelectric liquid crystal”  
J. Prakash, **A. Malik**, T. Joshi, A. Kumar, A. Dhar, and A. M. Biradar, **International Conference on Nanomaterials and Nanotechnology (ICNANO)**, University of Delhi, New Delhi, India, Dec. 18-21 (2011).
- [7] “Faster and ionic impurities free electro-optic devices based on copper oxide decorated multi-walled carbon nanotubes doped ferroelectric liquid crystal”  
**A. Malik**, J. Prakash, A. Kumar, A. Dhar, and A. M. Biradar, **19<sup>th</sup> National Conference on Liquid Crystals, NCLC-19**, Thapar University, Patiala, Punjab, India, Nov. 21-23 (2012).
