# CONTENTS

Acknowledgements .......................... I
Abstract ........................................ II
List of Figures ................................ IV
List of Tables ................................. VI
Contents ......................................... VII

## 1 ASSEMBLY SEQUENCE PLANNING .......................... 1
1.1 Introduction .................................. 1
1.2 The Assembly System ......................... 2
1.3 Assembly Planning .......................... 3
1.4 Assembly Sequence Planning ............... 4
1.5 Current research trend in Assembly Sequence Planning ....... 5
1.6 Organization of the thesis .................. 7

## 2 LITERATURE REVIEW ................................. 9
2.1 Introduction .................................. 9
2.2 Graph based approaches .................... 10
2.3 Genetic Algorithm .......................... 14
2.4 Simulated Annealing ......................... 18
2.5 Ant Colony Optimization .................... 19
2.6 Particle Swarm Optimization ............... 20
2.7 Petri Nets .................................. 21
2.8 Neural Networks ............................ 23
2.9 Miscellaneous algorithms .................... 24
2.10 CAD based approaches ..................... 25
2.11 Research Gaps .............................. 29
3 PROBLEM DEFINITION
3.1 Introduction 32
3.2 Problem statement 34
3.3 Objectives of research work 35
3.4 Proposed generalized framework for research work 36

4 DATA EXTRACTION AND INTERPRETATION FROM CAD PRODUCT DEFINITION
4.1 Introduction 39
4.2 Extraction of product data 41
4.3 Extreme coordinates of each part in assembly 42
4.4 Interpretation of Product data 46
   4.4.1 Relationship Matrix 46
   4.4.2 Complete Inclusion Matrix 47
   4.4.3 Overlap Matrix 49
   4.4.4 Major Inclusion Matrix 52
4.5 Results and discussion 53
4.5 Conclusions 57

5 COMPONENT TYPE REALIZATION AND PRECEDENCE RELATIONSHIP GENERATION
5.1 Introduction 59
5.2 Component type realization 59
   5.2.1 Connector component realization 60
   5.2.2 Secondary component realization 61
   5.2.3 Main parts realization 61
5.3 Precedence relationship generation 61
5.4 Results and discussions 65
   5.4.1 Knuckle Joint 65
   5.4.2 Non-Return Valve 67
8 CONCLUSIONS, CONTRIBUTION AND FUTURE SCOPE

8.1 Conclusions

8.1.1 Literature review, research gaps and problem definition 98

8.1.2 Data extraction and interpretation from CAD Product definition 100

8.1.3 Component type realization and precedence relationship generation 101

8.1.4 Assembly configuration identification and precedence relationship generation 102

8.1.5 Automated generation of Hierarchical Directed Graph 102

8.2 Contributions of the research work 103

8.3 Limitations and future scope of the research work 103

Bibliography 105

Publications based on the research 111

Course Work 112
