PAPER II

PERSONAL PROFILE
LIST OF TABLES

Table 3.1  Distribution of the Elderly by their Socio–economic Characteristics and Gender................................................................. 89
Table 3.2  Distribution of the Elderly by their age and Socio-Economic Characteristics........................................................................ 90
Table 3.3  Reason to the Continue Work for cash income by gender and family type........................................................................ 99
Table 3.4  Monthly Income of Elderly by Gender and Family Type......................... 100
Table 3.5  Percent changes in some household characteristics of the elderly households........................................................................ 102
Table 3.6  Household characteristics of the elderly by type of tribal community...104
Table 3.7  Percent changes in fuel use for cooking and lightning in elderly households........................................................................ 106
Table 3.8  Percent change in the assets possessed by the elderly households........ 107
Table 4.1  Distribution of elderly according to their socio economic status and some household facilities by headship of household.................112
Table 4.2  Distribution of elderly according to their house ownership and household headship.................................................................... 114
Table 4.3  Elderly relationship with head of household according to their social status and gender............................................................... 115
Table 4.4  Intergenerational living arrangement of the elderly by their gender and social status................................................................. 116
Table 4.5  Selected measures of living arrangements of elderly persons in joint and nuclear family and with type of tribes................................. 117
Table 4.6  Distribution of elderly by their household structure and socio economic status........................................................................ 118
Table 4.7  Elderly views on preferred intergenerational living arrangement in old age................................................................................... 118
Table 4.8  Distribution of elderly by living arrangements and feeling about over all living condition in different tribal dominance category.............122
Table 4.9  Distribution of elderly and status of single room for them by gender in different social status category........................................... 124
Table 4.10  Major areas of changes as perceived by the elderly in their community .................................................................................................................. 126

Table 4.11  Elderly views regarding responsible factors for perceived changes...... 128

Table 4.12  Factor loadings based on factor analysis with varimax rotation for 20 items measuring major changes in tribal community as perceived by the elderly........................................................................................................... 132

Table 4.13  Factor loadings based on factor analysis with varimax rotation for 10 items measuring responsible causes for major changes in tribal community as perceived by the elderly.................................................. 134

Table 5.1  Distribution of Seven Indicators of household decision making by socio-economic and demographic characteristics of elderly among tribal’s community........................................................................................................ 142

Table 5.2  Association of Demographic, Current working for cash and health condition With Decision making autonomy among elderly............... 150

Table 5.3  Association of Living arrangement and Socio-economic variable with Decision making Autonomy among elderly................................. 153

Table 5.4  Multiple linear regression analysis of Autonomy in Decision making at household level versus different socio-economic and demographic variables........................................................................................................ 154

Table 5.5  Distribution of Elderly by Decision Making Index and Different Demographic and Socio economic Characteristics............... 157

Table 5.6  Association of decision making autonomy with living arrangement pattern...................................................................................................... 159

Table 6.1  Distribution of elderly by socio economic, demographic characteristic and health risk factors with self-rated health status................................. 171

Table 6.2  Unadjusted and adjusted odds ratios (OR) and 95% confidence intervals (95% CI) of reporting Good or bad health by socio-economic factors and health risk factors................................................................. 174

Table 6.3  Distribution of elderly by some socio demographic variable and various physical disabilities ................................................................. 181

Table 6.4  Daily Eating Habits and Type of Food Consumption among Elderly Living in Tribal Community of Eastern Uttar Pradesh.................. 183

Table 6.5  Consumption of Alcoholic Beverages, Cigarettes, Bidi and Illegal drugs among Elderly of Tribal Community................................................ 184

Table 6.6  Percentage distribution of elderly by type of living arrangement according to use of disability assistance equipment........................................ 189
Table 6.7  Logistic regression Analysis of self rated health status vrs living arrangement of elderly................................................................. 190

Table 6.8  Prevalence of asthma, tuberculosis, diabetes and joint ache among the elderly by selected Socioeconomic and Demographic characteristics................................................................. 191

Table 6.9  Distribution of elderly by type of medical treatment using during illness among tribal Community................................................................. 192

Table 6.10  Distribution of elderly by preference regarding source of medical treatment during illness of tribal community......................................................... 194

Table 7.1  Awareness among elderly about social welfare programs implemented by the government and NGO’s by their socio-economic & demographic characteristics........................................................................................................... 201

Table 7.2  Logistic regression presenting the effect of Decision making autonomy, Social status, Income Status and some Background Characteristics on Knowledge About the social welfare program being implemented by the government and NGO........................................................................................................... 203

Table 7.3  Distribution of respondents receiving different benefits from the government runs programs by their socio-economic, demographic variables........................................................................................................... 207

Table 7.4  Elderly knowledge about the ‘Maintenance and Welfare of Parents and Senior Citizen Act, 2007 as per the tribal dominance districts................. 209

Table 7.5  Awareness about the provisions of the new legislation act 2007 by young family members in the household................................................................. 210

Table 7.6  Logistic regression presenting the association of decision making autonomy, socio-economic status and some background characteristics on the elderly view that ‘children will punish if they don’t care their older parents’........................................................................................................... 212

Table 7.7  Logistic regression presenting the association of decision making autonomy, socio-economic status and some background characteristics with social welfare program........................................................................................................... 217

Table 7.8  Logistic regression presenting the effect of decision making autonomy, social status, income status and some background characteristics on perception regarding elderly have capacity to plan / implement development schemes........................................................................................................... 225
LIST OF FIGURES

Figure 3.1  Distributions of Elderly according to their Age and Gender.............. 86
Figure 3.2  Gender Distributions of Elderly According to their Level of Literacy in Eastern Uttar Pradesh................................................................. 87
Figure 3.3  Distribution of the elderly according to their marital status and sex..... 88
Figure 3.4  Age-wise distribution of the elderly by nature of work done before attaining the age of 60 years................................................................. 91
Figure 3.5  Percent changes in monthly household income of the elderly.......... 93
Figure 3.6  Percent changes in yearly cash saving of elderly households.......... 94
Figure 3.7  Percent changes in access of loans by elderly households............ 95
Figure 3.8  Percent changes in elderly household income from all sources..... 96
Figure 3.9  Currently working for cash income by the elderly....................... 97
Figure 3.9a  Nature of current work for cash income..................................... 98
Figure 3.10  Percentage distribution of leisure time activities by the elderly..... 101
Figure 4.1  Status of separate room to live for elderly by different demographic variable among tribal community..........................................................119
Figure 4.2  Satisfaction about current living condition according to different socio-demographic characteristics.................................................................120
Figure 5.1  Distribution of the elderly participation in seven decision making variables at household level..............................................................................144
Figure 5.2  Decision regarding the items cook in the household......................145
Figure 5.3  Decision regarding health care for sick person including the elderly.... 146
Figure 5.4  Decision regarding children education in elderly household......... 147
Figure 5.5  Decision regarding purchasing jewelry or major household items.... 147
Figure 5.6  Decision regarding visiting parents/relative/friends/siblings home..... 148
Figure 5.7  Decision regarding daily expenditure of the household.................149
Figure 5.8  Decision regarding to spend their own income of the elderly ........ 149
Figure 5.9  Awareness and Participation of the elderly at community level organization........................................................................................................... 161
Figure 5.10 Cause of interested to become Members of Various Community Organization................................................................. 162
Figure 5.11 Decision regarding to take voting decision among the elderly............ 163
Figure 6.1 Self rated health status of the elderly................................................................. 170
Figure 6.2 Distribution of elderly by different source of household income and self reported health status................................. 179
Figure 6.3 Percentage distribution of elderly aged 60 according to their physical Disability........................................................................ 180
Figure 6.4 Types of Equipments being used by the elderly for their physical disabilities..................................................................... 182
Figure 6.5 Consumption of alcoholic beverages, cigarettes, bidi and illegal drugs among elderly of tribal community.................................................... 185
