Appendix

1. **Introduction**
   1.1 Research Background
   1.2 Research Problem Statement
   1.3 Purpose of the Study
   1.4 Research Questions
   1.5 Research Benefits
   1.6 Research Limitations
   1.7 Outcomes of the Research
   1.8 Thesis Structure
       References

2. **Research Design and Methodology**
   2.1 Research Approach
   2.2 Case Study
   2.3 Research Planning
   2.4 Methods Used for Data Collection
       References
3. Literature Review

3.0 Fundamentals of e-Governance

3.1 Definition and Scope

3.2 Applications
   3.2.1 Government to Citizen (G2C)
   3.2.2 Government to Business (G2B)
   3.2.3 Government to Government (G2G)
   3.2.4 Government to Employee (G2E)

3.3 Advantages of e-Governance
   3.3.1 Objectives of e-Governance

3.4 Critical Issues in e-Governance
   3.4.1 e-Governance Design and Development
   3.4.2 Targeted Users
   3.4.3 Culture
   3.4.4 Infrastructure
   3.4.5 e-Readiness

3.5 e-Governance Models

3.6 e-Governance experience review
   3.6.1 Worldwide e-Governance Experience review
   3.6.2 e-Governance Experience in India
       3.6.2.1 National level e-Initiatives

3.7 Study of ICT
   3.7.1 Fundamentals of ICT
   3.7.2 ICT Architecture
   3.7.3 Different types of ICT

3.8 ICT Based e-Governance

3.9 ICT Architecture Approaches
   3.9.1 Client Side Approaches
   3.9.2 Server Side Approaches
   3.9.3 Proxy Based Approaches
   3.9.4 Service Based Approaches

3.10 Use of ICT for women Literacy in Rural areas

References
4. Analysis for ICT Based e-Governance Model

4.1 Requirement Analysis for e-Governance
4.2 Why ICT Based Solutions
4.3 Critical Success Factors
   4.3.1 Leadership
   4.3.2 Reform
   4.3.3 People
   4.3.4 Technology
   4.3.5 Collaboration
4.4 Benefits of Using ICT Based Solutions for e-Government
   4.4.1 Rapid Elasticity
   4.4.2 Maintenance and Technical Support
   4.4.3 Cost Effectiveness
   4.4.4 Disaster Recovery
   4.4.5 Green ICT Eco- Friendly System
4.5 ICT Services Deployment in Governmental Sector Case Study
4.6 Top 10 Requirement for ICT based e-Governance Model

References

5. Proposed Model of e-Governance Using ICT

5.1 Overview of Uttarakhand
5.2 Use of ICT to Analyze the requirement and Issues for e-Governance Model in Rural areas of Uttarakhand
   5.2.1 Challenges for Implementing in e-Governance Technology in rural
   5.2.2 e-Governance Projects in India
   5.2.3 Major Issues in Uttarakhand
5.3 Uttarakhand State Wide Area Networks
   5.3.1 The Broad Objectives of Uttarakhand state wide area networks are
5.4 Web Portal Services for e-Governance at State level
5.5 IT Vision and Strategy
   5.5.1 IT Infrastructure
5.6 State Citizen Data Card (SCDC)
5.6.1 State Data Centre (SDC)

5.7 IT and e-Governance initiatives in Uttarakhand

5.8 Common Service Centre (CSC)
   5.8.1 Service Offered through CSC
   5.8.2 Government Services- G2C
   5.8.3 Business to Business- B2B/ G2B
   5.8.4 Business to Consumer services- B2C
   5.8.5 Common Service through CSC

5.9 Advanced Architecture Algorithm of Sensor Based Robotics Security System frameworks for e-Governance Technology
   5.9.1 Range of Sensors
   5.9.2 Robots Controller can have a multi level hierarchical architecture
   5.9.3 Artificial intelligence level
   5.9.4 Control mode level
   5.9.5 Servo System level
   5.9.6 Guiding the system
   5.9.7 Robot level programming

5.10 Algorithm for Sensor based robotics Controlling

5.11 Application of Robotics in different type of e-Governance technology
   5.11.1 Hospital Robotics
   5.11.2 Remote monitoring system in e-Governance Technology
   5.11.3 Security Robotics System in Securities areas
   5.11.4 Outdoor Robots
   5.11.5 Intelligent Robotics Kiosk

5.12 What robots can do Right now in e-Governance Technology?
   5.12.1 Cleaning
   5.12.2 Automated Hauling
   5.12.3 Security
   5.12.4 Alarm Clock
   5.12.5 Entertainment
   5.12.6 Education

5.13 What Robotics system will be able to do in the future technology
   5.13.1 Pest Control
   5.13.2 Child Care
5.13.3 Advanced Home securities and Management
5.13.4 Hazard Detection
5.14 Uses of e- Governance
5.15 WEBtop (Operating System on web)
   5.15.1 Benefits of web OS
   5.15.2 Research Methodology
   5.15.3 Review of 10 web OS
5.16 Design Goals and Directions
   5.16.1 User Interface
   5.16.2 Architecture
5.17 Findings
   5.17.1 Some Limitations Reviewed
5.18 State data warehouse
   5.18.1 Benefits of state data warehouse
   5.18.2 Online search Option
   5.18.3 e-Payment and m-Payment
   5.18.4 m-services (Mobile Phone Based Services)
   5.18.5 SMS Alerts (In Local Language)
5.19 Data Security
   5.19.1 Authentication
   5.19.2 Privacy
   5.19.3 Authorization
   5.19.4 Integrity
5.20 Benefits of Proposed System
References

6. Research Outcomes
6.1 System requirement
6.2 System Design
6.3 Model Application Implementation
   6.3.1 The Basic PaaS Private ICTLife Cycle
   6.3.2 Design of PaaS Private ICTWith oracle Fusion Middleware
      6.3.2.1 Application Grid
6.3.2.2 User Interaction
6.3.3 Identity Management
6.3.4 System Management
References

7. Research Findings and Conclusion

7.1 Research Findings
7.2 Conclusion
   7.2.1 Benefits and Disadvantages of Using the ICT for e-Governance
7.3 Future Work

Bibliography

Appendix: Research Papers
