Acknowledgements

I am eager to express my feelings of gratitude for people who have come across me during my Ph.D tenure of three and a half years at IMTECH. My stay at IMTECH was a mixed recipe containing both sweet as well as sour tastes. But affection, blessings and care from many people made me able to live my life fully.

First of all, I express my deepest regards to my supervisor, Dr. K.V. Radha Kishan for giving me opportunity to work in his lab as well as his useful suggestions and keen interest in proceeding research project. I am grateful to him for his faith on me and also for freedom what he gave to me for implementing my ideas while carrying out project. His caring and co-operative attitude, patience and faith on me really helped me during my most difficult time of Ph.D when I had been suffering a lot because of my poor health for a long tenure of about 8 months. I adore his keen observations, valuable feedbacks and motivations that proved as a key for the successful completion of my thesis work.

I am highly grateful to our director (IMTECH) for providing me an excellent infrastructure to carry out my research work.

I express my sincere regards to Dr. Anand K. Bachhawat and Dr. Nandita Bachhawat for their each and every personal as well as professional help. I am grateful to him for giving me opportunity as well as guidance to work on HPLC in his lab. Other than different professional help, they gifted me sound health by helping me in the recovery from my illness during Ph.D tenure otherwise I could never be able to complete my project.

I am thankful to Dr. Javed Agrewal as well as Dr. Nigir also for their best efforts in the direction of improving my health.

I express my gratitude to Dr. Purnananda Guptasarma and his lab members especially Vipin, Saranjoy madam for Circular dichroism studies. I am also thankful to Shubbir, Sanjeev and Swati for helping me in the molecular biology work during initial days.

I am really thankful to Hemraj sir for useful discussions with him as well as providing me different chemicals like D, L-5-para hydroxyl phenylhydantoin and D,L-5-Phenyldantoin and their hydrolysis products which were mandatory for my project.

I am also thankful to Dr. Alok Mondal, Dr. Jagmohan Singh, Dr. K. Ganeshan and Deepak for entire DNA sequencing work.

I am very grateful to Dr. G.C. Varshney for providing me nitrogen cylinder which was backbone for research project.

I also express my feelings of gratitude for Dr. Prasad for giving me opportunity to utilize nitrogen chamber as well as different color photographs of the crystals from his camera.

I am thankful to Dr. Pushpa Agarwal for her every help when ever I needed urgently.

I want to show due respect for affection from Dr. Tapan Chakraborti.

I want to acknowledge help from Sri Kant sir who taught me for the first time how to make site directed mutations. I am highly thankful to Rahul Saxena and Sanjoy for his useful guidance regarding molecular biology and protein work which helped me a lot in my thesis work.

I am thankful to my friends and juniors; Ashu, Sushma, Deepika Agarwal, Kamna, Puja Goel, Jaspreet, Shekher, Manish Kumar, Sukhail, Akesh, and Robin Boro who have always been willing to help me in all manner. I always enjoyed scientific discussions with Shekher. I really grateful to Krishnamurthi for his immense help. I am thankful to Komary, Ashok ji and Malkiat Singh ji who helped me while solublizing D, L-p-hydroxy phenylhydantoin under nitrogen atmosphere.

I have sincere regards for Mrs. and Mr. Pajni for their affection and care. They made our stay at their home very comfortable and peaceful. They always co-operated with our odd timings dur thesis writing.

I am thankful to all my labmates; Sagar, Amit, Vijay, Monika, Rajendra and Satya Prakash. I always enjoyed so many knowledgeable scientific discussions with Sagar as well as Amit. They, being seniors, always provided me help in different ways. Vijay, my labmate as well as batchmate always gave me a good, helpful and co-operative company. I can never forget different personal as well as
professional helps from Monika. I want to give my heartiest thanks to Rajendra for his each and every help. He always gave me a helping hand and due care in my troublesome period of illness. It will be unfair if I forget Satya Prakash. I am thankful to him for his help in my experimental work during his training period.

I acknowledge Himjyot, my friend who always helped and motivated me to touch heights of the sky.

I really acknowledge Dr. Dwaiayan Ganguli, who has been my teacher while teaching all molecular biology thesis, a care taker at the time of my injury and husband for providing me moral support as well as immense affection. I could not imagine my thesis completion without his help.

I really acknowledge the affection, care and faith what I received from my in-laws, Atreyi didi, my sister-in-law, Sandeep jija ji, Masi-muni ji, Phool mausi ji and mausa ji. Their blessings never allowed me to loose my courage in my difficult time.

The day when I am going to submit my doctorate thesis, I acknowledge my nana ji and nani ji for their immense affection. I always found my nana ji as an ideal throughout my life. I really wanted to make him proud of me since my childhood and this dissertation is the first step in this direction which I could be able to fulfill with their blessings only.

I am thankful to my sisters; Manisha, Smita and Neha, jija ji and pratham. They always tried to provide me best environment and facilities for carrying out my studies. I can't forget how my sisters used to complete all household works on my behalf so that I could get more time for my studies.

And in the end, all my achievements basically belong to my parents. Without their love, care, motivation and faith, I couldn't even walk even a single step on my own feet. I have no words to express my feelings for them. This thesis is basically a realization of their dreams.

I would like to thank the library, BIC and administration for the help extended during my stay. Thanks are due to CSIR for the fellowship.

Finally, I would like to thank the Almighty for having showered upon the several gifts of life.
